

Species Conclusions Table

Project Manager: Jullie Hamilton	Project Name: Sunken Meadow Mitigation Bank
Date: April 5, 2016	Project Number: NAO-2007-3552

Project Description: Stream enhancement, restoration and preservation.

Species Under the Jurisdiction of FWS:

Species/Resource Name	Conclusion	ESA Section 7 / Eagle Act Determination	Species Info / Habitat Description	Notes / Determination
Northern long-eared bat (Myotis septentrionalis)	Potential habitat present and no current survey conducted	May affect	<p>"Northern long-eared bats spend winter hibernating in caves and mines, called hibernacula. They typically use large caves or mines with large passages and entrances; constant temperatures; and high humidity with no air currents. Specific areas where they hibernate have very high humidity, so much so that droplets of water are often seen on their fur. Within hibernacula, surveyors find them in small crevices or cracks, often with only the nose and ears visible.</p> <p>During summer, northern long-eared bats roost singly or in colonies underneath bark, in cavities, or in crevices of both live and dead trees. Males and non-reproductive females may also roost in cooler places, like caves and mines. This bat seems opportunistic in selecting roosts, using tree species based on suitability to retain bark or provide cavities or crevices. It has also been found, rarely, roosting in structures like barns and sheds."</p>	Relying upon the findings of the 1/5/2016 Programmatic Biological Opinion for Final 4(d) Rule on the Northern Long-Eared Bat and Activities Exempted from the Take Prohibitions to fulfill the project specific Section 7 responsibilities. Approximatley 0.5 acres of trees will be cut in the action area.

Species Conclusions Table

Date: April 5, 2016	Project Number: NAO-2007-3552
---------------------	-------------------------------

Eagles (Haliaeetus leucocephalus)				
Eagle Nests	Unlikely to disturb nesting bald eagles	No Eagle Act permit required		Stream restoration/enhancement on 360 LF of stream. Subject to IRT review.
Eagle Concentration Areas	Does not intersect with bald eagle concentration area	No Eagle Act permit required		
Critical Habitat				
N/A				
Other (species not listed above)				

Species Under the Jurisdiction of NOAA/NMFS				
Essential Fish Habitat	not present			
Anadromous Fish Use Area	not present			
Subaquatic Vegetation	not present			
HAPC Sandbar Shark	not present			
Atlantic Sturgeon	not present
