## *TNT Area Time-Critical Removal Action Former Nansemond Ordnance Depot*

The U.S. Army Corps of Engineers announces the availability of a work plan and files comprising the Administrative Record regarding the proposed time-critical removal action in the TNT Area located on the Tidewater Community College Portsmouth Campus in Suffolk, Virginia.

Earlier this year, the Corps removed Bulk TNT from the site known as the TNT area. The remaining soil in the TNT area contains high levels of Lead and TNT. As an interim measure, the Corps is proposing to place a geofabric material and a layer of clean soil on top of the TNT area to prevent anyone from coming into contact with the soil until the Corps can complete the full Remedial Investigation/ Feasibility Study of the site.
