

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
01-H0164 INWP	Evergreen Development Corporation DeButts Tract-Cluster R-1 Attn: Mr. Gaylon Beights Charlottesville, Virginia	Amendment to original permit to include an additional stream crossing not previously proposed for the construction of the Mosby Mountain subdivision development. The additional impact will be to 199 linear feet of perennial stream channel requiring the discharge of approximately 23.47 cubic yards of riprap fill be placed below the ordinary high water mark. Total project impacts will be approximately 0.03 acre.	Trib. to Biscuit Run	4/24/2006
01-V0306 INWP	Wachapreague Hotel/Marina Inc. c/o Zadoc R. Lewis, III P.O. Box 360 Wachapreague, Virginia 23480	1. Dredge an existing 96-foot long, 32-foot wide boat basin to a depth of -6 feet at mean low tide. Approximately 500 cubic yards of dredged material will be hauled off site to an existing upland containment site. 2. Replace up to 287 linear feet of bulkhead with backfill within one foot of the existing structure, on an "as needed" basis.	Wachapreague Channel	3/6/2006
01-V1946 IRGP	Chesapeake Bay Foundation ATTN: Mr. Paul Willey 6 Herndon Ave. Annapolis, Maryland 21403	1. Along the northeastern shoreline, construct two 93-foot long, 28-foot wide stone breakwaters. They will have a 107 foot gap and be placed a maximum of 101 feet channelward of the Mean High Water (MHW) shoreline and be 2.4 feet above the MHW. They will cover 5,208 sq. ft. of subtidal substrate. 2. Along the northwestern shoreline, to the west of the canal: construct a segment of rip-rap revetment 197 feet long and 38 feet wide; and a segment of riprap revetment 101 feet long and 38 feet wide. It will be 2.4 feet above the MHW and will cover 11,324 sq. ft. of intertidal and subtidal substrate. 3. Along the northwestern shoreline, to the east of the canal: construct a segment of rip-rap revetment 103 feet long and 38 feet wide; a 132 foot long, 38-foot wide stone groin will be attached to and extend channelward of the ri-rap revetment. It will be 2.4 feet above the MHW and will cover 8,930 sq. ft. of intertidal and subtidal substrate.	Tangier Bay	6/15/2006
02-K0027 INWP	Clintwood Elkhorn Coal Company P. O. Box 196 Hurley, VA 24620	Proposed modification to allow for the construction of a hollow fill (HF 4) that will impact approximately 606 linear feet of intermittent stream channel and a sediment pond (SB-12) that will impact approximately 239 linear feet of intermittent channel.	Cedar Branch	6/2/2006
02-R0321 INWP	Mr. & Mrs. Don & Paula Dazley 129 Saw Mill Road Williamsburg, VA 23188	Land cleared, grubbed and likely graded to create pasture. <i>Permitted 5 acres of impacts. Required restoration of 2.5 acres, as described in Resolution Agreement.</i>	unnamed trib to James	3/23/2006
02-R2107 INWP	James City County Division of Parks and Rec. c/o: Mr. John Carnifax 5249 C Olde Towne Road Williamsburg, VA 23188	Applicant proposes to place fill into 0.19 acres of forested wetland to develop a sports complex.	Longhill Swamp	4/17/2006
02-V2077 IRGP	B. Harrison James 5925 S. McGinnis Ct. Norfolk, VA 23502	The placement of 207 linear feet of rip rap revetment for erosion controll as depicted in drawings.	Eastern Branch of the Elizabeth	4/15/2006
03-E0002 INWP	City of Richmond Department of Parks, Recreation and Community Facilities 900 East Broad Street Room 603, City Hall Richmond, Virginia 23219	PCN to replace footbridge. Request for a wetland confirmation of the lake at Forest Hill Park.	Reedy Creek	5/22/2006
03-V0209 IRGP	Frank & Marie Ruggiere 14 Magnolia Place Glen Head, New York 11545	Construct a 102-foot long, 4-foot wide open-pile private pier having a 20-foot by 12-foot "T"-head and a channelward 10-foot by 6-foot "floating T-head". A 8-foot by 6-foot landng is attached on the landward end. The waterway is approximately 500 feet wide at the site.	Pungoteague Creek	1/25/2006
03-V1086 IRGP	C.W. Lawrence 21088 Marina Road Rescue, VA 23424	In water storage for boat repair facility as depicted by project drawings entitled, "Proposed Waterfront Improvements" and dated 4/6/06.	Jones Creek / Pagan River	5/19/2006
03-V1324 ISIP	Edward Peet North Stafford Associates 3240 Wilson Blvd. Suite 100 Arlington, Virginia 22201	Proposed 960-acre master-planned residential development with 2.46-acres of wetland impacts and 9,061-linear feet of stream impacts.	Austin Run	4/3/2006

<u>PERMIT NO.</u>	<u>PERMITEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
03-V1400 IRGP	Michael C. Knight, ETAL 2711 Huntington Rd. Charlottesville, VA 22901	Install 104' of rip rap stone upon properly toed in filter cloth along the shoreline and backfill cavity; and, refurbish ~228' of existing riprap breakwater/sill by adding riprap in order to achieve height of +2' MHW as per drawings date stamped by USCOE on 7/17/03. Revision rec'd 8/7/03 extending riprap from 80' to 104' as per drawings date stamped by USCOE on 7/30/03.!	Nomini Creek	6-6-2006
03-V1400	Mike Knight, et al 2711 Huntington Road Charlottesville, VA 22901	Construct (2) sections of bulkhead (104' & 180' and associated backfill, and construct (2) 20' groins. All construction is to be in accordance with the attached drawings dated "March 24, 2006".	Nomini Creek	6/30/2006
03-V1685 IVDC	IMO Investment Group, LLC P.O. Box 477 Troutville, Virginia 24175 Attn: B. Painter	Installation of a multi-culvert design to pipe approximately 1541 linear feet of headwater stream (1299 linear feet of Ore Branch and 242 linear feet of an unnamed tributary) for the development of a retail shopping center known as Ivy Market. The permittee will compensate the stream impacts by contribution to The Virginia Wetlands Restoration Trust Fund.	Ore Branch	2-2-2006
04-H0039 INWP	Mr. Troy Rutherford Town Houses at Willow Creek Rutherford Construction, Inc. P. O. Box 1051 Stuarts Draft, Virginia 24477	Proposed subdivision development which will impact approximately 150 linear feet of perennial stream channel and approximately 350 square feet of adjacent wetlands. Total impacts will be approximately 0.017 acres of jurisdictional waters to construct a road crossing requiring the discharge of approximately 14 cubic yards of fill below the ordinary high water mark.	Trib. to Goose Creek	2/10/2006
04-H0163 INWP	The Homestead L. C. Homestead Preserve - Parcel 12-A P. O. Box 2000 Hot Springs, Virginia 24445	Jurisdictional assessment of a proposed subdivision development within the Homestead Preserve at Warm Springs, Virginia which will include stream crossings.	Trib. to Warm Springs Run	1/26/2006
04-K0002 INWP	Paramont Coal Company Virginia, LLC P. O. Box 1578 Coeburn, VA 24230	Acreage amendment to approved permit area consisting of approximately 180 acres. The applicant is proposing additional impacts to approximately 910 linear feet of perennial stream; approximately 2760 linear feet of intermittent stream and approximately 1180 linear feet of ephemeral stream.	Big Branch	5/18/2006
04-K0014 INWP	Paramont Coal Company Virginia, LLC P. O. Box 1578 Coeburn, VA 24230	The original permit and previous modification approved impacts to approximately 9,100 Lft. of perennial stream, 12,350 Lft. of intermittent stream, 3,230 Lft. of ephemeral channel, and 3.0 acres of emergent wetlands. Modifications to approved impacts are proposed to approximately 1,810 Lft. of perennial stream. Modifications to approved impacts involve changes from indirect impacts to direct impacts or a change in type of impact (i.e., approved to be excavated, proposed to be filled). New impacts proposed by this modification include 1,810 Lft. of perennial stream, which were confirmed during the jurisdictional waters determination.	Greenbriar Creek	5/9/2006
04-K0023 INWP	Paramont Coal Company Virginia, LLC P. O. Box 1578 Coeburn, VA 24230	Request to add acreage in the Long Br area to the ex. surface mine. Mining additional acreage will involve constr of 2 new hollow fills & 1 sed pond. Constr of valley fill H will perm impact approx 337 lft of ephemeral channel & approx 1615 lft of intermittent to perennial channel. Approx 363 lft of stream channel will be temp impacted by the constr of pond 4. Valley fill 4 & pond 4 will be constructed in Roll Pone Branch. Valley fill 4 will also permanently impact approx 337 lft of ephemeral channel in an unnamed tributary of Cane Creek.	Cane Creek	5/9/2006
04-K0023 INWP	Paramont Coal Company Virginia, LLC P. O. Box 1578 Coeburn, VA 24230	Modification request proposes to add acreage in the Long Branch area to the existing surface mine. Mining the additional acreage will involve construction of two additional hollow fills and one sediment pond that will impact waters of the U.S.	Cane Creek	5/9/2006
04-K0094 INWP	A & G Coal Corporation P. O. Box 1010 Wise, Virginia 24293	Discharge of ~ 857 cyds of fill associated w/construction of sediment ponds, fills, & backfilling & regrading operations to restore site to AOC. The proposed operation will impact ~ 5,790 Lft perennial, 7,360 Lft intermittent, & 4,760 Lft ephemeral channel. Purpose is to recover coal reserves from Low Splint - No. 14 Coal Seams.	McHenry Fork	2/27/2006
04-R0507 INWP	Mr. Daniel Reagan 324 Claxton Creek Seaford, VA 23696	Request for jurisdictional determination on a 1.1 acre site for development of a single-family residence. Proposal to impact 0.02 acre of forested wetlands for development of a single-family residence. Approved site plans dated (fax) 4/17/06.	Goose Creek/Chisman Creek	4/17/2006

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>

04-R2581 IVDC	Sona Custom Homes Attn: Kirit Parbadia 675-A Nelms Circle Fredericksburg, Virginia 22406	The project consists of the discharge of fill material into waters/wetlands of the United States. The project proposes impacting 0.202 acre of palustrine forested wetlands.	Vaughn Branch tributary	3/8/2006
04-R3327 IRGP	City of Poquoson Department of Public Works ATTN: Jonathan Montgomery 500 City Hall Avenue Poquoson, VA 23662-1996	The applicant requests to maintenance dredge various tidal drainage ditches throughout the city.	various	6-12-2006
04-R3662 INWP	Edgerton Contracting - Mary Ann Wade Garnett Garnett Construction LLC 619 Allens Mill Road Yorktown, VA 23692	Request for JD on 0.46 are lot for development of single family residence.	Chisman Creek	2/8/2006
04-V0234 ISIP	Mr. Webb Tyler Greenbrooke, L. L. C. 7309 Hanover Green Drive Mechanicsville, Virginia 23111	Received a request to confirm a wetlands delineation for a three acre site and an off-site sanitary sewer corridor on 5-31-06. Second JPA for additional authorization to permanently convert 0.02 acre of palustrine forested wetlands to emergent wetlands for the purpose of constructing a portion of sanitary sewer to serve the development, to discharge fill material in 0.77 acre of palustrine forested headwater wetlands, 0.06 acre of palustrine emergent wetlands, 1.00 acre of open water, and 1,419 linear feet of intermittent streambed (0.08 acre) for the purposes of constructing roads, lots, stormwater management and associated erosion control structures. To mitigate the individual and cumulative adverse effects of this portion of the project, the applicant proposes to perpetually preserve certain on-site uplands, wetlands and streams (6 acres) and to purchase 1.70 wetland credits (1.62 @ 2:1 for 0.77 acre of PFO wetlands fill, 0.06 @ 1:1 for 0.06 acre if PEM wetlands fill and 0.02 @ 1:1 for 0.02 of PFO wetlands conversion) from the Willis River Mitigation Bank located in Buckingham County, Virginia. The applicant proposes to compensate for 1,419 linear feet of streambed impacts by appropriate preservation at a site known as Woodland Partners located in Chesterfield County, Virginia. Additional sections of the project are forthcoming. Cumulative permanent impacts will total 2.30 acres of wetlands and 1,746 linear feet (0.102 acre) of streambed.	Allens Branch	4-11-2006
04-V0805 INWP	Fluvanna County Board of Supervisors Att: Mr. John Robins P. O. 05-V2355 IRGP	Mr. Robert DeFord 2712 Southern Blvd. Virginia Beach, VA 23454	To construct a 6-foot wide by 276-foot long by 5-foot high community pier with a 14-foot wide by 69-foot long L-head, two (2) 3-foot wide by 32-foot long finger piers creating four (4) boat slips channelward of the L-head, two (2) guest slips and a floating dock and associated access ramp landward of the L-head. All construction to follow plans dated December 20, 2005 (USACE date stamped January 19, 2006).	E/B Elizabeth River	1/23/2006
05-V2367 INWP	East Tennessee Natural Gas Company 5400 Westheimer Court Houston, Texas 77056-5310 Attn: Kim Chesler	Installation of approximately 30.5 miles of 20" natural gas pipeline within 2 Virginia counties - known as the Jewell Ridge Lateral Project. All the work that will occur in Virginia includes the crossing of 48 waterways and 17 wetlands. Total length of the 48 streams to be crossed is 545 linear feet; with a total of 0.73 acre of wetlands to be impacted by the 17 crossings; 0.1 acre of forested wetlands and 0.63 acre of shrub-scrub wetlands. The permittee will compensate the wetland impacts by contribution to The Virginia Wetlands Restoration Trust Fund	Various	4/28/2006
05-V2381 IRGP	Stephen P. Watson 802 Bayfront Ave North Beach, MD 20714	Construct a 6 by 70 foot long open pile pier to include a 12 by 20 foot L-head leading right, a boat lift and 3 mooring piles	Cod Creek	2/16/2006
05-V2388 IVDC	City of Roanoke 215 Church Avenue, SW Municipal Building - Room 350 Roanoke, Virginia 24011 Attn: Natalie D. Shepard	(Southern Hills Drainage Improvement) - The construction activities will result in the alteration 875 linear feet of a headwater stream. These losses will be offset by an off-site mitigation package that includes a natural stream restoration design of an unnamed tributary of Tinker Creek on a minimum 1:1 basis, and stream riparian buffer enhancement (planting 50' buffer each side) along the stream. The total mitigation area at Thrasher Park will be outlined in the final mitigation plan and will be preserved in perpetuity by the granting of protective covenants.	Ore Branch	2/14/2006
05-V2389 IVDC	Faison - Southern Lane, LLC 121 West Trade Street - 27th Floor Charlotte, North Carolina 28202-5399 Attn: Francis B. Teague, III	Alteration 690 linear feet of headwater streams for the installation of a culvert, construction of the Home Depot and associated parking. These losses will be offset by an off-site mitigation package that includes stream riparian buffer enhancement and preservation along 1402 linear feet of stream channel. The total off-site mitigation area will include 20.2 acres of riparian plantings and preservation. All the mitigation areas will be preserved in perpetuity by the granting of protective covenants and shall occur at an off-site location in the Roanoke River basin in Montgomery County, Virginia.	Ore Branch	6/2/2006

06-F0039 IRGP	Mr. Macon White 1835 Eaton Ferry Road Littleton, NC 27850	Construction of a pier and boathouse as described on the plans received by the Corps on March 3, 2006.	Lake Gaston	3/6/2006
06-F0040 IRGP	Mr. Mark A. Milam 9408 Philbeck Lane Wake Forest, NC 27587	Construction of a pier and boathouse as described on the plans received by the Corps on March 3, 2006.	Lake Gaston	3-6-2006
06-F0045 INWP	Mr. Ward Burton Post Office Box 519 Halifax, Virginia 24558	Construction on a recreational pond. The impoundment structure will be approximately 15 feet high by approximately 130 feet long. The impoundment structure will impact 60 linear feet of stream bed and backflood 440 linear feet of intermittent/perennial stream (see plan received by the Corps on February 9, 2006).	Banister River tributary	3-9-2006
06-F0046 INWP	Mr. James A. Fowlkes III 1476 East Courthouse Road Blackstone, VA 23824	Request to culvert 160 linear feet of a 2 foot wide intermittent stream to protect a single family home carport foundation.	Cellar Creek tributary	3/22/2006
06-F0055 INWP	Mr. Coy Harville 548 Riverbend Road Danville, VA 24541	Installation of a 40 linear foot culvert for a driveway access capable of carrying the same volume as the culvert immediately down stream for Old Mayfield Road.	Dan River tributary	4/5/2006
06-F0056 IRGP	Mr. Jerry Burgdoerfer 535 Alexander Drive Bracey, VA 23919	Installation of 25 linear feet of rip-rap impacting approximately 50 square feet of non-vegetated shore line as depicted on the plans received by the Corps on April 23, 2006.	Lake Gaston	4/4/2006
06-F0057 INWP	Mr. Roger Coleman 172 Rose Hill Drive Crewe, Virginia 23933	Construction on a recreational pond. The impoundment structure will be approximately 12 feet high by approximately 150 feet long. The impoundment structure will impact 60 linear feet of stream bed and backflood 440 linear feet of intermittent/perennial stream (see plan received by the Corps on April 4, 2006).	Nottoway River tributary	4/5/2006
06-F0060 INWP	Crewe Country Club Attn. Mr. Lee Simmons Post Office Box 52 Crewe, Virginia 23930	Construction of 3 small recreational ponds. The impoundment structures will be approximately 4 feet high by approximately 20 feet long. The impoundment structure will impact 25 linear feet of stream bed each and backflood approximately 40 linear feet of intermittent stream each (see plan received by the Corps on April 11, 2006).	Winningham Creek tributary	4/13/2006
06-F0061 INWP	Mr. John Woodard 119 Greentree Drive Keysville, Virginia 23947	Construction on a recreational pond. The impoundment structure will be approximately 8 feet high by approximately 300 feet long. The impoundment structure will impact 60 linear feet of stream bed and backflood 400 linear feet of perennial stream (see plan received by the Corps on April 12, 2006).	Carey Creek tributary	4/13/2006

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
06-F0063 INWP	Mr. E. Carlyle Franklin 602 South Hughes Street Apex, NC 27502	Construction on a recreational pond. The impoundment structure will be approximately 18 feet high by approximately 120 feet long. The impoundment structure will impact 84 linear feet of stream bed and backflood 1250 linear feet of intermittent stream (see plan received by the Corps on April 12, 2006).	Blue Wing Creek tributary	5/12/2006
06-F0067 INWP	Thomas D. Stang 24500 Kings Valley Road Damascus, MD 20872	Request for a Nationwide Permit #18 verification to pipe and fill 0.01-acres (84 linear feet) of stream channel and to place 0.02-acres of fill (less than 25 cubic yards) in wetlands to develop a viable access to the owners property as depicted in the Letter Report dated April 27, 2006.	Bluestone Creek tributary	5/1/2006
06-F0068 INWP	Mr. Scott Alfe 1641 Oral Oak Road South Hill, Virginia 23970	Construction on a recreational pond. The impoundment structure will be approximately 12 feet high by approximately 180 feet long. The impoundment structure will impact 60 linear feet of stream bed and backflood 500 linear feet of intermittent stream (see plan received by the Corps on May 2, 2006).	Mason Creek tributary	5/3/2006
06-F0070 INWP	Mr. Brian Neal Post Office Box 218 Alberta, Virginia 23821	Construction on a recreational pond. The impoundment structure will be approximately 15 feet high by approximately 175 feet long. The impoundment structure will impact 70 linear feet of stream bed and backflood 550 linear feet of intermittent stream (see plan received by the Corps on May 2, 2006).	Bold Branch tributary	5/3/2006
06-F0071 INWP	Mr. Scott A. Lewis Post Office Box 526 Victoria, Virginia 23974	Construction on a recreational pond. The impoundment structure will be approximately 10 feet high by approximately 175 feet long. The impoundment structure will impact 60 linear feet of stream bed and backflood 450 linear feet of intermittent stream (see plan received by the Corps on May 4, 2006).	Nottoway River tributary	5/8/2006
06-F0072 INWP	Mr. Lewis Hawthorne 1941 Bagleys Mill Road South Hill, VA 23970	Construction on a recreational pond. The impoundment structure will be approximately 8 feet high by approximately 40 feet long. The impoundment structure will impact 40 linear feet of stream bed and backflood 60 linear feet of intermittent stream (see plan received by the Corps on May 8, 2006).	Meherrin River tributary	5/9/2006
06-F0073 INWP	Mr. L. E. Hubbard 220 Dale Drive Greenbay, Virginia 23942	Construction on a recreational pond. The impoundment structure will be approximately 10 feet high by approximately 150 feet long. The impoundment structure will impact 50 linear feet of stream bed and backflood 450 linear feet of intermittent stream (see plan received by the Corps on May 9, 2006).	Mountain Creek tributary	5/9/2006
06-F0077 INWP	Mr. LLOYD "Doc" Clarke 2159 Union Church Road Halifax, Virginia 24558	Construction on a recreational pond. The impoundment structure will be approximately 20 feet high by approximately 240 feet long. The impoundment structure will impact 110 linear feet of stream bed and backflood 950 linear feet of intermittent stream (see plan received by the Corps on May 2, 2006).	Mikes Creek tributary	5/17/2006
06-F0078 INWP	Mr. Anthony DeMarco Post Office Box 61 Meherrin, VA 23954	Excavating for a fishing hole from open water pond (NPR) and sidecasting dredged material on to a wetland area approximately 4000 square feet in size.	Bush River tributary	5/17/2006
06-F0080 INWP	Ms. Kathy Astell 862 Butler Farm Road Chase City, Virginia 23924	Construction on a recreational pond. The impoundment structure will be approximately 6 feet high by approximately 20 feet long (totally within the existing stream bank-full limits). The impoundment structure will impact 34 linear feet of stream bed and backflood 200 linear feet of intermittent stream (see plan received by the Corps on May 2, 2006).	Little Bluestone Ck tributary	5/26/2006
06-F0081 INWP	Mr. Brian Parrish 324 Doswell Road Blackstone, VA 23824	Construction on a recreational pond. The impoundment structure will be approximately 10 feet high by approximately 110 feet long. The impoundment structure will impact 50 linear feet of stream bed and backflood 175 linear feet of intermittent stream (see plan received by the Corps on May 26, 2006).	Horsepen Creek tributary	5/31/2006
06-F0082 IRGP	Mr. Darrell Howard 220 Lynnfield Lane Garner, North Carolina 27529	Modification of a boat dock to accommodate a boat lift.	Lake Gaston	6/5/2006

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
06-F0084 INWP	Mr. Tim Thornburg 8405 Oak Meadow Drive Kernersville, NC 27284	Construction on a recreational pond. The impoundment structure will be approximately 10 feet high by approximately 100 feet long. The impoundment structure will impact 50 linear feet of stream bed and backflood 250 linear feet of intermittent stream (see plan received by the Corps on June 8, 2006).	Peter Creek tributary	6/9/2006
06-F0090 INWP	Mr. Legare Hairston 445 Ridge Drive Clarksville, Virginia 23927	Installation of 290 linear feet of rip-rap impacting approximately 580 square feet of non-vegetated shore line as depicted on the plans received by the Corps on June 13, 2006.	Kerr Reservoir	6/19/2006
06-F0092 INWP	Mainline Investments, LLC Post Office Box 45 Crewe, Virginia 23930	Construction on a recreational pond. The impoundment structure will be approximately 24 feet high by approximately 200 feet long. The impoundment structure will impact 106 linear feet of stream bed and backflood 500 linear feet of intermittent stream. Total wetland impacts are approximately 4000 square feet. (see plan received by the Corps on June 20, 2006).	Mallorys Creek tributary	6/21/2006
06-F0093 INWP	Mr. Jack Boswell Post Office Box 45 Crewe, Virginia 23930	Construction on a recreational pond. The impoundment structure will be approximately 12 feet high by approximately 200 feet long. The impoundment structure will impact 50 linear feet of stream bed and backflood 400 linear feet of intermittent stream (see plan received by the Corps on June 20, 2006).	North Branch tributary	6/22/2006
06-F0095 INWP	Mr. Jack Boswell Jr. 2534 Twin Lakes Road Burkeville, Virginia 23922	Construction on a recreational pond. The impoundment structure will be approximately 12 feet high by approximately 200 feet long. The impoundment structure will impact 60 linear feet of stream bed and backflood 400 linear feet of intermittent stream (see plan received by the Corps on June 20, 2006).	North Branch tributary	6/22/2006
06-G0003 INWP	Raymond Moore Rt. 1, Box 86-1A Pamplin, VA 23958	Impound an intermittent, headwater stream to create a pond approximately 1 to 2 acre in surface size.	Bowler Creek headwater trib	1/24/2006
06-G0005 INWP	Samuel Massie, M. D. 111 Perkins Mill Road Lowesville, VA 22967	1. remove build-up of sediments, cobble and debris that resulted from a storm event. 2. restore and stabilize severely scoured riverbank at the property.	Piney River	3/2/2006
06-G0005 INWP	Samuel Massie, M. D. 111 Perkins Mill Road Lowesville, VA 22967	1. remove build-up of sediments, cobble and debris that resulted from a storm event. 2. restore and stabilize severely scoured riverbank at the property.	Piney River	3/2/2006
06-G0007 INWP	Don Bowen 735 Laurel Road Faber, VA 22938	create a pond approximately 1 acre in surface size by excavating an area from the bottomland and allowing it to fill from spring channels on the property. The work will affect less than 500 linear feet of stream and approximately 3800 square feet of emergent and scrub shrub wetlands.	Rockfish River tributary	2/6/2006
06-G0008 INWP	Roy Stiltner Stonebrook Farm 15245 Loyalty Rd Waterford, VA 20197	Impound 2 separate tributary streams to create ponds approx. 1.5 acre surface size and 2.5 acre surface size. No wetlands will be impacted by the proposals.	Falling Rock Creek tributaries	3/2/2006
06-G0010 INWP	Joe White 21 Callaway Court Lynchburg, VA 24502	Impound a stream to create a pond approximately 3 acres in surface size. The impoundment (including the footprint of the dam and the backflooding) will cause the loss of no greater than one-tenth acre of wetlands nor greater than 500 linear feet of stream.	S/F Falling River	2/13/2006
06-G0011 INWP	Mark and Betty Campbell Deer Creek Farm 3466 Lowesville Rd. Lowesville, VA 22967	Remove debris and sediment/cobble loading that resulted from a storm event and is causing erosion of farmland.	Piney River tributary	2/15/2006
06-G0012 INWP	Tom Dewitt Dewitt Real Estate 20185 Timberlake Rd. Lynchburg, VA 24502	A utility line crossing of Ivy Creek and two unnamed streams by trench excavation and returning stream bottoms to pre-existing contours and appropriate sloping and stabilization of the banks.	Ivy Creek and tributaries	1/24/2006

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
06-G0021 INWP	Lake Monticello Owner's Association Attn: Monty DeCarlo 41 Ashlawn Boulevard Lake Monticello, VA. 22963-3330	Stream restoration (requiring instream work) and riparian restoration of approximately 311 linear feet of perennial stream and 323 linear feet of intermittent stream; and riparian restoration, above OHW, along approximately 1,016 linear feet of remaining streams.	Lake Monticello tributaries	2/13/2006
06-G0024 INWP	James Sullenberger 4901 Waller Road Richmond, VA 23230	Impound a stream to create a pond approximately 2 to 3 acres in surface size. The dam and backflooding will impact less than one-tenth acre of wetlands and no greater than 500 linear feet of stream.	Seneca Creek tributary	2/6/2006
06-G0025 INWP	Billy Wood 6905 Jeff Davis Hwy Spottsylvania, VA 22553	impound a headwater stream to create a pond approximately 1 acre in surface size. The impoundment (including the footprint of the dam and the backflooding) will not cause the loss of greater than one-tenth acre of wetlands nor greater than 500 linear feet of stream.	Horsley Creek tributary	2/13/2006
06-G0027 INWP	David Towles 9851 Oakville Rd. Gladstone, VA 24553	construct a pond approximately 1 acre in surface size. The impoundment (including the footprint of the dam and the backflooding) will not cause the loss of greater than one-tenth acre of wetlands nor greater than 500 linear feet of stream.	Bent Creek tributary	2/13/2006
06-G0029 INWP	Tom Harvey Global Environment and Technology Foundation 2900 South Quincy St., Suite 410 Arlington, VA 22206	Impound a headwater stream to create a private pond. Site inspection revealed the dam and backflooding will affect less than one-tenth acre of riparian wetlands and no greater than 500 linear feet of perennial stream.	Perry Creek tributary	3/3/2006
06-G0034 INWP	Ironhound Subdivision Church Hill Development Company 170 South Pantops Drive Charlottesville, VA 22911	A single road crossing of a stream to serve a proposed subdivision. No other impacts to streams or wetlands are proposed nor anticipated as necessary for the development of the lots. The crossing will impact approximately 112 linear feet of stream with culvert and scour protection. The jurisdictional discharge to waters of the U. S. is calculated at less than 10 cubic yards. E & S measures will be utilized.	Oliver Creek tributary	4/4/2006
06-G0036 INWP	Ben Tucker 2736 Lexington Tnpk Amherst, VA 24521	Remove debris and sediment blockage from the waterway which resulted from a storm event. The storm deposition is causing scouring and erosion of the banks and the upland property.	Piney River	2/13/2006
06-G0037 INWP	Gary Baldwin Baldwin Excavation Co. P. O. box 57 Piney River, VA 22964	1. Remove debris and cobble blockages that resulted from storm events. 2. Use large cobble for erosion control and bank stabilization along property. Bank stabilization activity is less than 500 ft. in length and will not be placed for stream diversion.	Tye River	2/21/2006
06-G0037 INWP	Gary Baldwin Baldwin Excavation Co. P. O. box 57 Piney River, VA 22964	1. Remove debris and cobble blockages that resulted from storm events. 2. Use large cobble for erosion control and bank stabilization along property. Bank stabilization activity is less than 500 ft. in length and will not be placed for stream diversion.	Tye River	2/21/2006

The dam and backflooding will affect less than one-tenth acre of wetlands and less than 500 linear feet of stream.	S/F Appomattox River tributary	6/19/2006

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
06-G0095 INWP	Kenny Bernard 658 Rainbow Forest Dr. Lynchburg, VA 24502	impound a headwater stream to create a pond approximately three-fourths of an acre in surface size. Less than one-tenth of an acre of wetlands and less than 500 linear feet of stream will be affected by the dam and backflooding.	Big Cub Creek tributary	6/19/2006
06-G0103 INWP	Tony Stout Rt. 2, Box 95 Gladstone, VA 24553	create a series of step pools along approximately 100 linear feet of a headwater stream on property.	Austin Creek tributary	6/19/2006
06-G0108 INWP	Chris King 193 King Lane Farmville, VA 23901	Construct an impoundment on an ephemeral drainage area to capture stormwater runoff. During dry periods, water is proposed to be pumped from a downstream channel to the impoundment.	Gannaway Creek tributary	6/16/2006
06-G0110 INWP	Bedford County Public Service Authority 1723 Falling Creek Rd Bedford, VA 24523	sewer line installation to serve the community.	Hunting Creek tributary	6/26/2006
06-G0111 INWP	Dominion Environmental Services Attn: Joyce B. Livingstone, REM, CEA Environmental Specialist III Bremo Bluff Power Station	Maintenance of an existing diversion wall to ensure sufficient water level supply to pumps.	James River	6/16/2006
06-G0121 INWP	Shelly and Scott Wolf 516 Carriage Hill Drive Forest, VA 24551	dam constructed on a stream to create a private recreational pond. The dam and backflooding will result in less than one-tenth acre of wetlands and less than 300 linear feet of stream channel.		6/30/2006
06-H0008 INWP	Mr. David M. Morris 531 Amicus Road Stanardsville, VA 22973	Proposed maintenance of an existing culvert crossing removing accumulated cobble and debris from around the crossing. Total distance will not exceed 200 linear feet.	Parker Branch	1/17/2006
06-H0009 INWP	Mr. Robert Sansom P. O. Box 878 Stanardsville, VA 22973	After-the-fact authorization to maintain two existing fords and a small area of streambank and channel work within a 50-ft area.	Parker Branch	2/6/2006
06-H0011 INWP	Cave View Farm Weyers Cave, Virginia	Proposed construction of 6 livestock and equipment crossings and three pipeline crossings of a headwater stream for agricultural purposes. Five crossings will be concrete slat mats and one crossing will be a 24" culvert. The pipe crossings will be buried below channel bed.	Trib. to North River	1/20/2006
06-H0011 INWP	Cave View Farm Weyers Cave, Virginia	Proposed construction of 6 livestock and equipment crossings and three pipeline crossings of a headwater stream for agricultural purposes. Five crossings will be concrete slat mats and one crossing will be a 24" culvert. The pipe crossings will be buried below channel bed.	Trib. to North River	1/20/2006
06-H0014 INWP	Rivanna Water & Sewer Authority P. O. Box 18 695 Moores Creek Lane Charlottesville, Virginia 22902	Proposed upgrade to an existing 16-inch ductile water line which will require the crossing of a small headwater stream. A temporary cofferdam will be installed during the installation, and riprap will be placed for approximately 25 feet over the installed pipe to stabilize the streambed and banks at the project site.	Trib. to Meadow Creek	1/27/2006
06-H0014 INWP	Rivanna Water & Sewer Authority P. O. Box 18 695 Moores Creek Lane Charlottesville, Virginia 22902	Proposed upgrade to an existing 16-inch ductile water line which will require the crossing of a small headwater stream. A temporary cofferdam will be installed during the installation, and riprap will be placed for approximately 25 feet over the installed pipe to stabilize the streambed and banks at the project site.	Trib. to Meadow Creek	1/27/2006
06-H0015 INWP	Mr. Stanley S. Watkins 5896 Gordonsville Road Keswick, VA 22947	Proposed access road to a new house location requiring the construction of three road crossings on a small intermittent headwater stream. Each crossing will use a 24" x 20" . Total impacts will be approximately 0.007 acres.	Trib. to Mechunk Creek	1/30/2006
06-H0016 INWP	Sidney & Brad Grove 1675 Airport Road Bridgewater, VA 22812	Maintain an existing road crossing to remove accumulated cobble and debris in order to increase water flow. Project will not exceed a total of 200 linear feet upstream and downstream of the crossing.	Trib. to North River	1/30/2006

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
06-H0017 INWP	Mr. Robert McMasters 1482 Mt. Torrey Road Lyndhurst, VA 22952	Proposed project to maintain an existing steel bridge by removing accumulated cobble and debris from approximately 200 linear feet of channel to improve channel flow during storm events. The excavated material will be hauled to an upland disposal area.	Back Creek	1/31/2006
06-H0022 INWP	Mr. David Lambert 9889 Wolftrap Lane Dayton, VA 22821	Stabilize up to 100 linear feet of eroding bank using large stone placed at the toe of the bank.	Wolf Run	2/6/2006
06-H0023 INWP	Ms. Lois Shifflett 547 Homeplace Lane Elkton, VA 22827	Proposed project to stabilize approximately 150-200 linear feet of badly eroding bank below an existing bridge, and remove accumulated cobble from a bar forming and which is impacting the eroding bank.	Hawksbill Creek	2/20/2006
06-H0026 INWP	Shady Grove Church Attn: Mrs. Carol Johnson 7766 Mission Home Road Free Union, VA 22940	Proposed project to stabilize approximately 200 linear feet of eroding bank that has been caused by recent flooding events, and if not stabilized may cause the access road to wash out, and impact the foundation of an existing church. Material from a cobble bar will be used to backfill the eroding bank.	Lynch River	2/15/2006
06-H0027 INWP	Mr. Ricky Austin 934 Arnold Valley Road Natural Bridge Station, VA 24579	Stabilize approximately 400 linear feet of highly eroding bank to prevent damage to trailers at an existing trailer park. Project will require the excavation of accumulated cobble and debris from a point bar forcing high flows against the bank. Large rock will be placed at the toe and backfilled with the excavated cobble where available.	Elk Creek	2/22/2006
06-H0030 INWP	Mr. Roger Phillips 11638 Hopkins Gap Road Fulks Run, Virginia 22836	Maintain an existing ford used to get farming equipment across the river, and remove a cobble/debris blockage caused by a recent flooding event that has resulted in forcing the normal flows down through a farm field. The project is to remove this cobble/debris blockage and open up the natural channel. The removed cobble/debris will be used to plug up the flood damaged bank and flood channel to prevent future flows through the farm field.	Shoemaker River	2/15/2006
06-H0033 INWP	Mr. Mark Martin Blue Ridge School Route 627 Dyke, VA 22935	Proposed construction of a stream crossing to access to a building lot.	Entry Run Creek	6/14/2006
06-H0034 INWP	HM Acquisition Group LLC Towncenter Drive P. O. Box 5584 Charlottesville, VA 22905	Proposed construction of an access road running from State Route 606 to the Hollymead Towncenter property. The project will involve the crossing of a small perennial headwater stream using a 72-inch by 134". Total impact will be approximately 160 linear feet of channel and approximately 0.015 acres of total impact. Between 12 and 17 cubic yards of fill will be used to bed the pipe below the ordinary high water mark.	Trib. to Powell Creek	2/20/2006
06-H0035 INWP	Barry Dofflemyer Wexford Subdivision, LLC P. O. Box 86 Earlsville, VA 22936	Proposed subdivision that will require the upgrade of an existing pond to include an emergency spillway and additional height to the dam in order to provide a safety margin for expected high flows.	Trib. to Marsh Run	2/20/2006
06-H0036 INWP	Barry Dofflemyer The Village at Chestnut Ridge P. O. Box 86 Earlsville, VA 22936	Proposed housing development requiring the construction of an access road that will cross an intermittent and perennial headwater stream. One crossing will require the placement of up to a 24" x 30' culvert impacting approximately 40 linear feet of channel requiring approximately 2 cubic yards of fill to bed the pipe below the ordinary high water mark. The second will require the piping of approximately 350 linear feet of perennial stream using a 48" x 224' pipe requiring approximately 22 cubic yards of fill to bed the pipe below the ordinary high water mark. Total impacts of the project to jurisdictional waters will be approximately 0.02 acres.	Trib. to Jacobs Run	2/20/2006
06-H0037 INWP	Mr. James Wright Springfield Lane Mint Springs, VA	Proposed project to move approximately 100 linear feet of a perennial headwater stream channel impacted by cattle access causing erosion and downstream siltation. The new channel will be constructed about 30 feet over and cattle will be fenced from the new channel. the project will improve water quality and reduce downstream siltation.	Trib. to Christians Creek	2/20/2006
06-H0042 INWP	Rivanna Water & Sewer Authority Attn: Ms. Andrea B. Terry P. O. Box 18 695 Moores Creek Lane Charlottesville, Virginia 22902	Proposed project to maintain two existing fords by adding small amounts of gravel to the crossing in order to cross safely. All work will be done within the footprint of the existing ford. The project is to assist the Virginia Department of Game & Inland Fisheries in a fish stocking program.	South Fork Moormans River	2/27/2006

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
06-H0043 IVDA	Traditional Homes of Albemarle Attn: Mr. Tony Davis 3052 Berkmar Drive Charlottesville, VA 22901	After-the-fact channel modification of a small perennial stream channel on Lot L23 in the Twin Lakes Subdivision. Total channel impacts are approximately 100 linear feet of a small 3-foot wide perennial headwater stream for a total impact of approximately 0.007 acres.	Trib. to Quarter Creek	5/17/2006
06-H0044 IVDA	Traditional Homes of Albemarle Attn: Mr. Tony Davis 3052 Berkmar Drive Charlottesville, VA 22901	After-the-fact channel modification of a small perennial stream channel on Lot U4 in the Twin Lakes Subdivision. Total channel impacts are approximately 150 linear feet of a small 3-foot wide perennial headwater stream for a total impact of approximately 0.01 acres.	Trib. to Quarter Creek	5/17/2006
06-H0045 INWP	Mr. Jeff Shumate HCR 3, Box 14 McDowell, VA 24458	Stabilize approximately 150 linear feet of eroding in two spots, (1) for 100 linear feet, and (2) for 50 linear feet. The project is to protect an existing fence and farm field where past flooding events has cause bank erosion in these areas. Large rock will be used at the toe of the bank as available.	Davis Run	3/2/2006
06-H0046 INWP	Mr. Mike Frazier 3815 Presidents Road Scottsville, VA 24590	Restore approximately 210 linear feet of a small braided headwater perennial stream channel to a single channel.	Trib. to Quarry Creek	3/3/2006
06-H0047 INWP	Blue Ridge School Attn: Mr. Ronald L. Floor Highway 627, Bacon Hollow Road St. George, VA 22935	Proposed project to maintain an old existing man-made channel providing water to an existing lake which has become clogged with debris and accumulated cobble. Channel blockages will be removed at spots along the channel and deposited on upland disposal site. The channel diverts flow from Chesley Hollow Creek in order to maintain lake levels. No more than 1/3 volume of creek channel flow will be directed into the lake. The outflow comes back into Chesley Hollow Creek downstream of the school.	Chesley Hollow Creek	3/3/2006
06-H0048 INWP	Mr. Robert C. Jordan P. O. Box 654 Hardy, Virginia 24101	Maintain an existing culvert crossing where past flooding events have caused accumulated cobble and debris to be deposited on the upstream side of the culverts. The project is to remove this accumulated material to open up the culverts to designed capacity. Work will not exceed 150 feet above the crossing.	Back Creek	3/6/2006
06-H0050 INWP	Augusta County Service Authority Attn: Mr. Jesse L. Roach P. O. Box 859 Verona, VA 22980	Proposed project to install approximately 950 linear feet of 8" water line along Indian Mound Road which will require the crossing of two small intermittent headwater stream channels. The crossing will be constructed below the channel bottom in a concrete encasement. Once installed the channel will be returned to pre-existing contours.	Trib. to Middle River	3/7/2006
06-H0051 INWP	Murcielago, LLC Attn: Mr. Thomas Sullivan 121 Loring Avenue, Suite 340 Salem, MA 01970	Proposed project to upgrade an existing culvert crossing to accommodate a larger pipe to allow better passage of expected high flows. Pipe and road crossing will remain approximately the same width. The upgraded pipes will be 60-in..	Trib. to Turkey Run	4/12/2006
06-H0052 INWP	Murcielago, LLC Attn: Mr. Thomas Sullivan 121 Loring Avenue, Suite 340 Salem, MA 01970	Proposed project to construct a farm/recreational pond impacting approximately 0.033-acres of perennial stream channel, back flooding approximately 479 linear feet of channel. No wetlands will be impacted by the project.	Joe Creek	3/22/2006
06-H0053 INWP	Mr. James W. Hazel Angler Environmental 12801 Randolph Ridge Lane Suite 102 Manassas, VA 20109	Proposed project to stabilize and restore approximately sloping banks on a 2:1 and using biologs, matting and live stakes, rock vanes, root wads and J-hook methodology. A forested buffer of approximately 10 feet will be planted at the top of the newly stabilized bank. The project is split into two sections for a total project distance of 490 +/- linear feet where work will be done.	South River	3/8/2006
06-H0054 INWP	Mr. William E. Jones 968 Devon Spring Court Charlottesville, VA 22903	Proposed project to construct a small recreational pond back flooding no more than 150 linear feet of perennial stream channel. Total pond size will be approximately 100' x 60'.	Trib. to Moormans River	3/8/2006
06-H0055 INWP	U. S. Forest Service Attn: Mr. Steve Tanguay, District Biologist Warm Springs Ranger District RR1, Box 30 Hot Springs, VA 24445	Stabilize approximately approximately 50 linear feet of eroded bank with riprap, install 5-10 large boulders for fish enhancement, and install a boulder deflector just above the site to redirect moderate flows away from the bank.	Jackson River	3/10/2006

<u>PERMIT NO.</u>	<u>PERMITEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
06-H0056 INWP	Mr. James Aistrop 21 Mill Creek Lane Stuarts Draft, VA24477	After-the-fact authorization for a project to restore a foot bridge and the intermittent headwater stream channel around the foot bridge after being damaged by recent flooding events. The foot bridge will have replacement supports put in, and approximately 150 linear feet of channel was reshaped and realigned to pass under the foot bridge.	Trib. to South River	3/9/2006
06-H0058 INWP	Great Eastern Resort Corporation c/o Peak Construction 3779 Palmer Road, Suite 2 Massanutten, VA 22840	Proposed project to construct a culvert crossing of a small intermittent headwater stream to provide additional access to the ski parking area of the resort. The project will involve the placement of a 70 LF x 90" CMP culvert. Approximately 40 linear feet of channel will be impacted by the placement of stone for scour protection resulting in approximately 110 linear feet of channel impacts, and a total area of approximately 0.01 acres of impact. Less than 15 cubic yards of fill will be discharged below the ordinary high water mark to bed the culvert.	Trib. to Stony Run	3/15/2006
06-H0059 INWP	Mr. David C. Clark 126 Calfpasture Lane Goshen, Virginia 24439	Maintain an existing ford by adding rock to provide a safe crossing for the trucks transporting poultry litter.	Calfpasture River	3/15/2006
06-H0060 INWP	Mr. Ron Williams 5558 John Wayland Highway Dayton, Virginia 22821	Construct a culvert crossing at an existing ford to provide better access to an existing cabin. The project will install three 24" x 16' culverts with a concrete cap. The project was coordinated with the Virginia Department of Game & Inland Fisheries for scope of work and time of year restrictions.	Skidmore Fork Creek	3/16/2006
06-H0061 INWP	William A. Landes Dixey Farm 4201 Walkers Creek Road Middlebrook, VA 24459	Proposed access road to a subdivision requiring the construction of a stream crossing using an arch culvert design. The span will be placed on concrete abutments placed on the bank of the creek. One abutment may encroach slightly below the ordinary high water mark requiring minimal impact to the stream channel. No wetland will be impacted by the project.	Trib. to Marlbrook Creek	6/22/2006
06-H0066 INWP	Mr. Orren Royal Rt. 644 Blue Grass, VA	Proposed project to restore approximately 150 linear feet of intermittent headwater stream channel that has become choked with sediment and cobble. The project is to restore channel capacity to help in reducing overbank flooding and erosion. Work will be done from the bank with a backhoe.	Frank Run	3/22/2006
06-H0068 INWP	Murcielago, LLC Attn: Mr. Thomas Sullivan 121 Loring Avenue, Suite 340 Salem, MA 01970	Proposed project to upgrade an existing crossing of a small intermittent headwater stream, and to install an additional crossing on a small drainage swale as part of a road realignment. The pipes will be 24" x 20'. Total impacts to channel bottom will be approximately 0.002 acre.	Trib. to Turkey Run	4/12/2006
06-H0068 INWP	Murcielago, LLC Attn: Mr. Thomas Sullivan 121 Loring Avenue, Suite 340 Salem, MA 01970	Proposed project to upgrade an existing crossing of a small intermittent headwater stream, and to install an additional crossing on a small drainage swale as part of a road realignment. The pipes will be 24" x 20'. Total impacts to channel bottom will be approximately 0.002 acre.	Trib. to Turkey Run	4/12/2006
06-H0070 INWP	Mr. James Helmuth 287 Whitmore Shop Road Harrisonburg, VA 22802	Construct a ford across a small perennial headwater stream channel to access property for a home construction project. The ford will be approximately 20' x 3' for total impacts of approximately 60 square feet.	Trib. to the Jackson River	4/10/2006
06-H0072 INWP	Mr. Steven Bunch 1944 Dudley Mountain Road Charlottesville, VA 22903	Proposed project to construct a culvert crossing of an intermittent headwater stream for horse access. The crossing will be constructed using a 24" x 20' culvert. Total channel impacts will be approximately 60 square feet.	Trib. to Hardware River	4/10/2006
06-H0073 INWP	Ms. Claiborne Lang General Delivery White Hall, Virginia 22987	Proposed access road to a proposed home construction site requiring the crossing of two small headwater streams. Both crossing will involve the installation of one or two 36" culverts approximately 16-feet long. Total impacts will be approximately 0.004 acre.	Trib. to Doyles River	4/12/2006
06-H0076 INWP	City of Charlottesville c/o Kristel Riddervold 305 4th Street, NW Charlottesville, VA 22903	Maintenance of an existing ford by constructing a rock vain to serve as a grade control for the crossing and to reduce normal maintenance of the ford.	N. Fk. Moormans River	4/13/2006

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
06-H0077 INWP	Mr. William E. Curry, Jr. 15 2-Bucks Lane Churchville, VA 24421	Proposed project to remove accumulated silt and vegetative debris from the mouth of a small perennial stream entering Jennings Branch in order to restore normal flows and prevent further buildup of the blockage at the creek mouth. An area up to approximately 100' by 15' will be removed using a trackhoe, backhoe or bucket loader to do the work. All material is to be placed on an upland disposal site.	Jennings Branch	5/17/2006
06-H0078 INWP	Mr. James B. Mohler Route 1, Box 103A Mt. Solon, VA 22843	Construct a culvert stream crossing as part of a CREP project administered by the Natural Resources Conservation Service to their design specifications. The crossing will require a 24" culvert. Total impacts will be less than 0.001 acre.	Possum Hollow Creek	4/14/2006
06-H0081 INWP	Weather Hill Development Attn: Mr. Frank V. Pohl, P.E. 703 East Jefferson Street Charlottesville, VA 22902	After-the-fact authorization for the construction of three homes within a small lot with will require the piping of a small spring-fed perennial stream channel into a 6-inch x 120-foot pipe in order to provide room to construct the homes. Total impacts to jurisdictional waters is approximately 240 square feet or 0.006 acres.	Trib. to Meadow Creek	4/20/2006
06-H0082 INWP	Mr. George Garrison 15 Zebs Way Lexington, VA 24450	Repair a riprap bank stabilization project just downstream of an existing bridge to maintain the protection of the project. Work will be done at locations within approximately 200 linear feet of bank.	Gilmer Creek	4/24/2006
06-H0084 INWP	Val and Susan Marz 75 Cranberry Lane Lexington, VA 24450	Construct a concrete culvert crossing using 4 15-inch culverts 33' long to provide access to a building site for a home. Total impacts will be approximately 0.004 acre.	Whistle Creek	5/1/2006
06-H0085 INWP	Ms. Andrea Doudera 348 Claymont Drive Earlsville, VA 22930	Replace an existing road crossing with an upgraded crossing approximately 50-feet downstream of the existing crossing using two 36-inch culverts approximately 20 feet long. Total impacts of the crossing will be approximately 0.005 acre and will require less than 10 cubic yards of fill to bed the pipes below the ordinary high water mark.	Trib. to Beaverdam Creek	5/1/2006
06-H0087 INWP	Mr. Robert Ballard 526 Rockfish Road Waynesboro, VA 22980	Construct a small recreational pond on a small perennial headwater stream. The pond will back up approximately 200 linear feet of channel and the dam will be approximately 10-15 feet high. The pond is to encourage wildlife production and raise fish.	Trib. to South River	5/5/2006
06-H0088 IVTB	Cliff View Golf Club Attn: Mr. Matt Sponaugle 111 Goldenrod Drive Covington, Virginia 24426	Proposed construction of a road crossing of an overflow channel of the Jackson River with two 18" pipes to allow access to the island for the construction of additional golf playing field. Total impacts will be approximately 0.013 acres. The project will also include bank stabilization along the overflow channel along the island bank as well as the mainland bank. Up to 150-200 linear feet of bank will be stabilized.	Jackson River	4-18-2006
06-H0088 INWP	Cliff View Golf Club Attn: Mr. Matt Sponaugle 111 Goldenrod Drive Covington, Virginia 24426	Proposed construction of a road crossing of an overflow channel of the Jackson River with two 18" pipes to allow access to the island for the construction of additional golf playing field. Total impacts will be approximately 0.013 acres. The project will also include bank stabilization along the overflow channel along the island bank as well as the mainland bank. Up to 150-200 linear feet of bank will be stabilized.	Jackson River	5/8/2006
06-H0088 INWP	Cliff View Golf Club Attn: Mr. Matt Sponaugle 111 Goldenrod Drive Covington, Virginia 24426	Proposed construction of a road crossing of an overflow channel of the Jackson River with two 18" pipes to allow access to the island for the construction of additional golf playing field. Total impacts will be approximately 0.013 acres. The project will also include bank stabilization along the overflow channel along the island bank as well as the mainland bank. Up to 150-200 linear feet of bank will be stabilized.	Jackson River	5/8/2006
06-H0089 INWP	Mr. Robin Eastham P. O. Box 125 Batesville, VA 22924	A proposed DGIF stream restoration project which will restore approximately 2000 linear feet of eroding bank using 7 log/rock structures to deflect flows and protect banks; slope at a 3:1 grade 2-5 foot vertical banks; and install coir fiber matting for short-term bank stability, seed mulch and plant the banks with a riparian buffer for long-term stability.	Jumping Branch	5/11/2006
06-H0091 INWP	Ms. Susan Plank 19037 Little Dry River Road Fulks Run, Virginia 22836	Stabilize approximately 150-200 linear feet of an eroding bank just downstream of the State Route 818 crossing of Old Road (Man) Hollow Creek using large rock sloping the bank and backfilling with soil to revegetate. A small cobble bar will be removed to the low water line in order to widen the channel enough to slope the eroding bank.	Old Road Hollow	5/15/2006

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
06-H0091 INWP	Ms. Susan Plank 19037 Little Dry River Road Fulks Run, Virginia 22836	Stabilize approximately 150-200 linear feet of an eroding bank just downstream of the State Route 818 crossing of Old Road (Man) Hollow Creek using large rock sloping the bank and backfilling with soil to revegetate. A small cobble bar will be removed to the low water line in order to widen the channel enough to slope the eroding bank.	Old Road Hollow	5/15/2006
06-H0092 INWP	Mr. Dennis Poletti 8150 Dick Woods Road Afton, VA 22920	Construct a small recreational pond on an intermittent headwater stream back-flooding approximately 400 linear feet of channel. No wetlands will be impacted by the pond. Total channel impacts will be approximately 0.018 acres.	Trib. to Stockton Creek	5/17/2006
06-H0093 INWP	Mr. Joe Kerley P. O. Box 3322 Charlottesville, VA 22903	Propose project to construct a culvert crossing of a small headwater stream channel to access a development site. The crossing will involve the installation of a 48-inch x 36' culvert. Total channel impacts will be approximately 0.003 acres and will require less than 10 cubic yards of fill to bed the pipe below the ordinary high water mark.	Trib. to Moores Creek	5/17/2006
06-H0094 INWP	Mr. Charles Collette 8587 Briery Branch Road Dayton, VA 22821	Clean accumulated material from around an existing culvert concrete crossing. The work will involve up to 100 feet below the existing crossing, and up to 100 feet below the existing crossing for a total of approximately 200 linear feet of channel.	Briery Branch	5/17/2006
06-H0095 INWP	Mr. Peter Taylor Box 485 Keswick, VA 22947	Proposed project to construct a small recreational/farm pond on a small perennial headwater stream. The project will backflood approximately 350 linear feet of channel in a pasture area. No wetlands will be impacted by the project. Approximately 0.02 acres or less of jurisdictional area will be impacted by the project.	Trib. to Mechunk Creek	5/17/2006
06-H0097 INWP	Mr. Ron Kerber Dominion Development Proffit Ridge Subdivision 4411 Turkey Sag Road Keswick, VA 22947	Proposed construction of an access road crossing of a small intermittent headwater stream to provide entrance to a subdivision. The crossing will use a 165" x 36" pipe impacting approximately 0.01 acre and require approximately 6 cubic yards of fill to bed the pipe below the ordinary high water mark.	Trib. to N. Fk. Rivanna River	5/25/2006
06-H0100 INWP	Valerie & Pat Lowry HC1, Box 325 Monterey, VA 24465	Stabilize approximately 200-250 linear feet of eroding bank to prevent further erosion into a fence line and sugar tree plantation. Large rock will be used as available and backfilled with material from an area nearby.	Back Creek	6/5/2006
06-H0102 INWP	Weather Hill Development Fontaine Townhouse Project Attn: Mr. Frank Pohl 703 East Jefferson Street Charlottesville, VA 22902	Proposed construction of a 10" water line to service the Fontaine Townhouse Project. There will be temporary impacts to approximately 0.007 acres for the placement of the pipe.	Moores Creek	6/9/2006
06-H0104 INWP	Mr. Jimmy Stargell 4204 Green Creek Road Schuyler, VA 22969	Proposed project to restore stream capacity in sections of a small perennial stream where the channel has become choked with sediment and vegetative growth. Approximately 350-400 linear feet will be restored at a number of points on the channel returning the channel to capacity matching undisturbed sections of the channel.	Trib. to Briar Fork Creek	6/13/2006
06-H0105 INWP	Ms Sarah May 111 Sturbridge Road Charlottesville, VA 22901	Stabilize approximately 50 linear feet of eroding bank to protect an apartment building. Large riprap will be used to stabilize the bank.	Trib. to Shenks Branch	6/13/2006
06-H0106 INWP	Mr. William Indoe Crossfields Farm Keswick, VA 22947	Replace an existing bridge with an updated bridge or two 72-inch culverts 34-feet long. Total impacts will be approximately 0.006 acres.	Trib. to Mechunk Creek	6/13/2006
06-H0107 INWP	Mr. Mark Manis 6100 Blenheim Road Scottsville, VA 24590	After-the-fact authorization to construct a road crossing to a single family home site using two 48" culverts and one 15" and one 24" culvert, all approximately 20' long. Total channel impacts of the project are approximately 0.002 acres.	Trib. to Hardware River	6/13/2006
06-H0109 INWP	County of Augusta Fire Training Center Attn: Mr. Doug Wolfe P. O. Box 590 Verona, Virginia 24482	Proposed construction of an access road to the Fire Training Center which will cross a small intermittent headwater stream. The crossing will require two 60" x 60" pipes with endwalls. Total channel impacts will be approximately 0.006 acres and will require approximately 10 cubic yards of fill placed below the ordinary high water mark.	Trib. to Middle River	6/14/2006

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
06-H0115 INWP	City of Buena Vista Attn: Mr. John Hart, Watershed Coordinator 2537 Alleghany Avenue Buena Vista, VA 24416	Proposed excavation of 10 test pits within a 2,300 linear foot section of Chalk Mine Run in order to determine the elevation of existing bedrock and to determine the stability of material during design flow events. Once the test pits are finished the channel bottom will be returned to preexisting contours.	Chalk Mine Run	6/19/2006
06-H0117 INWP	Mr. Curt Hancock 355 Gray Fox Road Mt. Sidney, VA 24467	Proposed construction of an access road for home construction requiring the crossing of a headwater stream using two 72" x 20' culverts. Total impacts will be approximately 0.002 acre.	Naked Creek	6/20/2006
06-H0122 INWP	Mr. Robert Neff Route 1, Box 29 Millboro, Virginia 24460	Fill in a small water retaining area of an existing pasture approximately impacting approximately 2000 square feet (0.04 acre) of wetland. Project to reduce standing water and to be able to cut hay in area. Ponding the result of VDOT ditching over the years. Originally part of an intermittent stream drainage that no longer is in evidence.	Trib. to Mill Creek	6/23/2006
06-H0123 INWP	Ms. Naomi Gregory Box 248 Stuples Hollow Road Craigsville, Virginia 24430	Maintain an existing culvert crossing that has become clogged with debris on the upstream side resulting in overbank flooding of a yard.	Stuples Hollow	6/27/2006
06-I0081 INWP	Silver Companies C/o Mr. Charlie Kilpatrick 1201 Central Park Blvd. Fredericksburg, VA 22401	Applicant proposes to stabilize stream and stormwater pond areas from erosion. Proposal to impact 0.02-acres of PEM wetlands and 14 linear feet of stream as per plans titled "Impacts Map, Docstone Commons" and dated June 2, 2006.	Cannon Creek	6/12/2006
06-J0002 INWP	Larry Keen 1736 Indian Creek Road Cedar Bluff, Virginia 24609	Installation of approximately 100' of 30" corrugated metal pipe along residential property. Pipe will be installed and countersunk in the streambed as per Corps regional conditions; and work will be performed when the streambed is completely dry.	Indian Creek	1/5/2006
06-J0003 INWP	Edward and Kimberly Clisby 643 Indian Valley Road Dugspur, Virginia 24325	Installation of a culverted road crossing - consisting of 40 linear feet of 2 - 36" corrugated pipe and associated riprap for inlet and outlet protection - to provide access residential property. Pipes will be installed and countersunk in the streambed as per Corps regional conditions.	Panther Creek	4-3-2006
06-J0008 INWP	JC Investments, Inc. P.O. Box 735 Rocky Mount, Virginia 24151	Installation of a culverted road crossing - consisting of 150 linear feet of 84" corrugated pipe and associated riprap for inlet and outlet protection - to provide access Phase 2 of a residential subdivision known as Rocky Mountain Highlands. Pipes will be installed and countersunk in the streambed as per Corps regional conditions.	Furnace Creek	2/2/2006
06-J0015 INWP	Mark & Julee Schmidt 1177 Longview Road Roanoke, Virginia 24018	Construction of a recreational pond impacting no more 1/10 acre of wetlands and approximately 300 linear feet of backwater within a headwater stream	Mudlick Creek	2/17/2006
06-J0017 INWP	McKnight & Company 70 Gillie Lane Blue Ridge VA 24064 Attn: Pete McKnight	Relocation of a 50 foot section of intermittent stream channel by recreating the same meander approximately 15 feet from the existing channel. The new channel will replicate sinuosity and dimensions of the existing channel to the most extent practicable. Purpose of the project is to provide a more stable situation for a new residence, which is situated within 10 feet of the channel and is experiencing severe bank erosion and undercutting.	Glade Creek	2/27/2006
06-J0024 INWP	Ron Mooney 5007 Cloverdale Road Roanoke, Virginia 24019	Installation of a culvert and fill approximately 200 linear feet of channel and less than 1/10 acre of wetlands in association with the construction of a single family residence	Catawba Creek	3/23/2006
06-J0035 INWP	Gary Rogers 15177 Moneta Road Moneta, Virginia 24121	Installation of approximately 800 linear feet of riprap along the ordinary high water shoreline and extending a maximum distance of 4' channelward of full pond elevation (795')	Smith Mt. Lake	3/24/2006

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
06-J0037 IRGP	Alouf Construction & Development 759 Boxwood Green Drive Wirtz, Virginia 24184	Excavate, by clamshell approximately 140 cubic yards of sediment within an area that varies from 22' to 52' wide and 92' long to a maximum additional depth of 3' at full pond elevation; as per drawings dated Jan 26, 2006. The dredged area will maintain 3:1 side slopes and will connect to the existing ambient depths; with all removed material deposited and contained on upland property, above the 800' elevation. Prior to any dredging the proposed area will be staked out and approved by the Corps, and AEP	Smith Mt. Lake	6/14/2006
06-J0038 IRGP	Tom Vinopal 5828 Cavanaugh Drive Raleigh, North Carolina 27614	Excavate, by clamshell, approximately 50 cubic yards of sediment within an area 30' wide and 30' long to a maximum depth of 6' at full pond elevation. The dredged area will maintain 3:1 side slopes and will connect to the existing ambient depths; with all material deposited and contained on upland property, above the 800' elevation. Prior to any dredging the proposed area will be staked out and approved by the Corps and AEP.	Smith Mt. Lake	6/27/2006
06-J0048 IRGP	Charles Taylor 100 White oak Circle Moneta, Virginia 24121	Excavate, by clamshell approximately 30 cubic yards of sediment within an area 16' wide and 30' long to a maximum additional depth of 6' at full pond elevation. The dredged area will maintain 3:1 side slopes and will connect to the existing ambient depths; with all removed material deposited and contained on upland property, above the 800' elevation. Prior to any dredging the proposed area will be staked out and approved by the Corps, and AEP	Smith Mt. Lake	6-20-2006
06-J0050 INWP	Eddie Shelton 411 Bucksrape Road Union Hall, Virginia 24176	Construction of a 24-foot high recreational impoundment on a perennial stream, and subsequently backing up the water approximately 450 feet	Standiford Creek	5/24/2006
06-J0053 INWP	Appalachian Power Company - Byllesby Hydro 3564 Byllesby Road Ivanhoe, Virginia 24350 Attn: Mark Smith	Relocation of an existing canoe portage by constructing a new gravel portage path on top of filter fabric material - from a takeout point on the river above the boat barrier, through a wetland area, and then connect to an existing gravel accessway. The path, less than 25 cubic yards of fill material, will be approximately 200 feet long, 3 feet wide and 1 foot deep.	New River	6-13-2006
06-J0056 INWP	Town of Christiansburg 100 East Main Street Christiansburg, VA 24073 Attn: Barry Helms	Installation of gabion baskets and concrete mats for a distance of approximately 300 linear feet - to provide stream bank stabilization along a section of Town Branch	Town Creek	5/12/2006
06-J0057 INWP	Tazewell County Board of Supervisors 106 East Main Street Tazewell, Virginia 24651	Placement of less than 10 cubic yards of fill material into 299 linear feet of headwater stream - in association with the construction of Rt. 696.	Big Branch	5/24/2006
06-J0058 INWP	Warehouse, Inc. 101 Flintlake Road Columbia, South Carolina 29202 Attn: Bobby Temple	Placement of less than 25 cubic yards of fill material into 180 linear feet of headwater stream - in association with the construction of Keagy Village	Barnhardt Creek	5/24/2006
06-J0060 INWP	Marcie Guthmann 130 Anthony Ford Road Penhook, Virginia 24137	Installation of approximately 955 linear feet of riprap along the ordinary high water shoreline and extending a maximum distance of 2' channelward of full pond elevation (795')	Smith Mt. Lake	6/27/2006
06-J0062 INWP	City of Roanoke 215 Church Avenue, SW Municipal Building - Room 350 Roanoke, Virginia 24011 Attn: Jason J. Thomas	Replacement of 40 feet of an existing 33" culvert with 58 feet of 36" culvert and repair associated gravity rock wall with the placement of riprap on a 1.5:1 slope adjacent to Rutrough Road	Horseshoe Branch	6/27/2006
06-J0063 INWP	Lake Pointe Development, LLC P.O. Box 1192 Forest, Virginia 24551 Attn: Gregory Y. Scott	Installation of approximately 1394 linear feet of riprap along the ordinary high water shoreline and extending a maximum distance of 2' channelward of full pond elevation (795') -- in association with a residential subdivision known as Blue Heron Estates.	Smith Mt. Lake	6/28/2006

06-R0470 ISIP	Cowart Seafood Corp. Virginia Seafood Council 755 Lake Landing Drive Lottsburg, Virginia 22511	The applicant is authorized to deploy 1.3 million non-native, triploid Suminoe Oysters (<i>Crassostrea ariakensis</i>) into the waters of the Bay and the Ocean. Each of the 13 participants may use a variety of aquaculture grow-out methods, including the use of floating upweller systems (FLUPSY). Grow-out methods authorized are: 1.) Clam relay cages or bottom cages, constructed of metal with a total height of 12" off the bottom with rigid polyethylene bags constructed with varying mesh sizes secured inside. 2.) Rigid polyethylene bags secured together by a long line and anchored to the bottom. The number of bags per line varies and is site specific. 3.) Metal racks with vertical sides of approximately 18" and a length of 10' to 20' driven into the bottom. Bags are strapped side by side onto the racks. 4.) Growers may use a floating upweller system, called FLUPSY, to enhance early growth of their allotment of oysters. Each participant will receive 100,000 genetic triploid <i>C. Ariakensis</i> to be grown on their private leases. The goal of this request is to demonstrate industry feasibility of growing market size triploid <i>C. ariakensis</i> in one-year, including the use of the paddlewheel FLUPSY.	various	6/23/2006
