04-V2829 INWP	John Swyter 804 Longwood Avenue Cherry Hill, NJ 08002-3408	4100 square feet (0.094) of direct impacts by means of fill for pad of proposed residential home on Lot 13, Peaceful Forest Subdivision. Total permitted impacts will be measured as 0.10 acres (43,560 square feet). To be recorded and attached to the Title during a conveyance of the property.		8/25/2005
04-V2843 IRGP	Baymark Construction Corp. c/o Dick Foster 1100 Eaglewood Drive Virginia Beach, Virginia 23454	Construct three breakwaters and placement of sand fill.	Chesapeake Bay	8/31/2005
04-V2844 ISIP	Bay Creek Marina & Resort, LLC 1532 Duke of Windsor Road Virginia Beach, Virginia 23454	The applicant proposes to construct five breakwaters, the southern four (4) will be "gapped" and the northern one (1) will be straight. From "end-to-end" they will be 230 feet long (the curve will take up some additional space) and have a bottom width of 33 feet and a top width of 8 feet. They will extend 5 feet above mean low water and 2.6 feet above mean high water. They will be placed approximately 225 feet apart. They will be placed approximately at the mean low water shoreline and, due to the curve, 200 feet channelward of the mean high water shoreline. Sand will be placed behind the structure, creating a wide beach. The breakwaters and sand placement will be along 3,200 linear feet of shoreline. The breakwater will cover approximately 37,950 square feet of intertidal substrate (1,150' X 33'). Placement of approximately 59,000 cubic yards of sand (in simulation of the anticipated "tomboli" effect) will cover a maximum of ?? square feet of intertidal substrate. However, the initial drifting of sand landward of the break waters (until the anticipate "tomboli" effect is reached) could fill a total of ? square feet of intertidal substrate. The project will directly impact ? square feet of widgeon grass (Ruppia maritima), which the applicant will mitigate on a 2:1 basis (31,430 square feet). An additional ? square feet of widgeon grass will not have sand placed on it but may be in an area of initial sand drift from the anticipated "tomboli" effect.	Chesapeake Bay	9/20/2005

05-G0111 INWP	P. Massie Saunders, Jr. 329 Crabtree Falls Hwy Roseland, VA 22967	riprap bank stabilization to prevent any further erosion of pastureland.	Tye River	10/5/2005
05-G0112 INWP	Thomas Simonin 1317 Courthouse Rd. Palmyra, VA 22963	Construct a series of 3 small dams on an intermittent stream to create three cascading ponds along a swale and an intermittent stream. Ponds will be relatively shallow to promote aquatic plant growth and will also be stocked with fish. Less than 1500 linear feet of swale and channel will be impacted by the dams and backflooding. No wetlands will be impacted.	Ballinger Creek drainage	10/5/2005
05-G0113 INWP	Thomas Johnson P. O. Box 1154 Amherst, VA 24521	impound a small headwater stream to create a pond approximately 1 acre in surface size.	Horsely Creek tributary	10/19/2005
05-G0114 INWP	P. Massie Saunders, Jr. 329 Crabtree Falls Hwy Roseland, VA 22967	minor fill of less than 500 square feet of emergent wetlands for vehicle/farm equipment access across pasture.	Lanes Ford drainage	10/5/2005
05-G0116 INWP	Carlton Ballowe 19218 Thomas Nelson Hwy Faber, VA 22938	construct a dam on an intermittent stream to create a private pond approximately 1 to 2 acres in surface size. The dam and backflooding will impact less than 1500 linear feet of the swale and intermittent stream and less than one-tenth acre of waters of the U. S., including wetlands.	drainage to unnamed tributary of	10/5/2005
05-G0117 IRGP	James Winebarger 2432 Linbrook Rd. Lynchburg, VA 24501	Remove cobble build up that has accreted instream and has diverted flow against opposite stream bank causing erosion. Cobble material will be used as bank stabilization where needed to combat erosion and/or protect woody vegetation along the bank.	Flat Creek	12/1/2005
05-G0120 INWP	Amy DiGregorio 1025 Ardmore Drive Lynchburg, VA.	Pipe and fill a headwater stream to create yard space for a house.	Ivy Creek tributary	11/21/2005
05-G0122 INWP	Roger Edwards P. O. Box 216 Big Island, VA 24526	Construct a culverted stream crossing for ingress and egress to property.	Overstreet Creek tributary	11/21/2005
05-G0123 INWP	B. J. Clark P. O. Box 382 Lovingston, VA 22949	Construct a private pond less than 2 acres in surface size on a tributary stream. The construction will result in less than 500 linear feet of stream being dammed and backflooded and less than one-tenth acre of waters of the U. S., including wetlands.	Tye River tributary	11/2/2005
05-G0124 INWP	Hughes C. Swain 5601 Rockfish Valley Hwy Afton, VA 22920	Remove cobble buildup from stream where it has accreted and is diverting flow against stream bank. The material will be used to stabilize the erosion caused by the diversion. Less than 50 linear feet of stream will be affected.	Pauls Creek	11/21/2005
05-G0125 INWP	Roger Edwards P. O. Box 216 Big Island, VA 24526	construct a dam on a headwater stream to create a small private pond. The footprint of the dam and the backflooding will affect less than 500 linear feet of stream and less than one-tenth acre of wetlands.	Overstreet Creek tributary	11/21/2005
05-G0132 INWP	John Gorman 12720 Poplar Forest Dr. Richmond, VA 23233	Restoration of channel and approximately 150-200 linear feet of bank stabilization to combat severe erosion as a result of a recent storm event.	Piney River	12/13/2005
05-H0029 INWP	Buckingham Branch Railroad Attn: Mr. Gale Wilson 650 C&O Flats Staunton, VA 24401	Proposed project to stabilize approximately 430 linear feet of a 25-foot high eroding bank along the railroad tracks. The use of coir logs, matting and filter fabric backfilled with rock and fill dirt will be used to extend the eroding bank. The restored banks will be revegetated, and the use rock J-hook vanes or deflectors will help channel the water away from the restored banks.	Mill Creek	7/5/2005

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
05-H0094 INWP	City of Charlottesville Charlottesville High School Department of Public Works 305 4th Street NW Charlottesville, VA 22903	Proposed project to stabilize approximately 47 linear feet of eroding bank with approximately 5.2 cubic yards of riprap below the OHWL. There will also be some removal of vegetative debris and fallen trees within the project area to restore stream capacity. This material will be disposed of on an upland site. No wetlands will be impacted by the project.	Schenks Branch	7/12/2005
05-H0117 INWP	City of Harrisonburg Attn: Mr. David H. Gray, PE Water and Sewer Operations Center 2155 Beery Road Harrisonburg, VA 22801	Proposed project to conduct maintenance on an existing exposed 8-inch water main and a 30-inch sanitary sewer main. The project will include approximately 150 linear feet of bank stabilization using rock placed at the toe of the bank, and the construction of two rock vane structures to help move the stream to its original channel. The bank will be restored by filling behind the rock toe with clay material and a covering of top soil and vegetative matting.	Blacks Run	7/5/2005
05-H0117 INWP	City of Harrisonburg Attn: Mr. David H. Gray, PE Water and Sewer Operations Center 2155 Beery Road Harrisonburg, VA 22801	Proposed project to conduct maintenance on an existing exposed 8-inch water main and a 30-inch sanitary sewer main. The project will include approximately 150 linear feet of bank stabilization using rock placed at the toe of the bank, and the construction of two rock vane structures to help move the stream to its original channel. The bank will be restored by filling behind the rock toe with clay material and a covering of top soil and vegetative matting.	Blacks Run	7/5/2005
05-H0118 INWP	University of Virginia Office of Environmental Health and Safety Attn: Mr. Jeffrey A. Sitler, CPG P. O. Box 400322 Charlottesville, VA 22904-4322	Proposed project to stabilize approximately 150 linear feet of eroding bank on a small headwater stream next to an athletic field. The field was recently upgraded with the addition of artificial turf. Rock and revegetation of the disturbed bank will be used to reduce the bank erosion.	Trib. to Meadow Creek	7/5/2005
05-H0119 INWP	Mr. Odel Crawford 6821 Rocky Bar Road Elkton, VA 22827	After-the-fact authorization to finish the construction of a stream crossing to access farm pasture from State Route 340. The finished crossing will consist of a 60-foot by 36" culvert placed in a small perennial stream. Total channel impacts will be approximately 0.005 acre, and will require approximately 7 cubic yards of fill placed below the ordinary high water line of the channel to bed the pipe.	Trib. to S. F. Shenandoah R.	7/8/2005
05-H0121 INWP	Mr. Allan B. Howerton Lynchburg Camp 129 Marvin Place Lynchburg, VA 24503	Proposed project to repair two existing concrete docks damaged by flooding and erosion. Class 2 riprap will be placed against the bank next to the docks for reinforcement and bank stabilization. New tops will be constructed, but overall encroachment into jurisdictional waters will remain approximately the same.	Cowpasture River	7/11/2005
05-H0122 INWP	Mr. Douglas Corbitt P. O. Box 651 Monterey, VA 24465	Proposed project to construct a low water culvert crossing of a perennial stream at a previously existing crossing in order to access property for a proposed house construction. Approximately 0.014 acres of channel bottom will be impacted. No wetlands will be impacted by the project.	Bolar Run	7/12/2005
05-H0123 INWP	Mr. George Rexrode P. O. Box 281 Warm Springs, VA 24484	Proposed project to stabilize approximately 200 linear feet of eroding bank using available large rock found on the site. These will be placed at the toe of the eroding bank and backfilled.	Bolar Run	7/12/2005
05-H0124 INWP	Mr. Bill McFadden HCR 02, Box 281 Bolar, VA 24484	Proposed project to place a small 14' x 40" culvert in a small intermittent headwater stream in order to access home heating equipment for maintenance. Approximately 28-40 square feet of channel bottom will be impacted by the project.	Trib. to Bolar Run	7/12/2005
05-H0127 INWP	Eric G. Shobe 1040 Turner Mountain Road Charlottesville, VA 22903	Proposed project to construct a recreational pond on a perennial stream which will back flood less than 500 linear feet. Approximately 0.07 acres of channel bottom will be impacted, and no wetlands will be impacted due to the relocation of the proposed pond.	Trib. to Stockton Creek	8/12/2005
05-H0131 INWP	Mr. John Todd 368 Poor Creek Lane Greenville, Virginia 24440-1809	Maintenance of an existing culvert crossing which may include the removal of accumulated cobble from within 200 linear feet of the culvert as a result of past flooding events in the area, including Hurricane Isabel.	Pine Run	7/19/2005
05-H0132 INWP	Mr. Ed Carter Custom Excavators 17035 Brocks Gap Road Fulks Run, Virginia 22830	Proposed project to repair and rehabilitate an existing culvert crossing with new pipe and concrete. There will be no change in the overall dimensions of the existing crossing. Repairs are for flood damage and decomposing metal culverts.	North Fork Shenandoah River	7/20/2005

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
05-H0133 INWP	Mr. Cole Fitzgerald 8049 South Lee Highway Buchanan, VA 24066	Proposed project to construct a culvert crossing of a small intermittent headwater stream to access a building lot. The crossing will be constructed using an oval 48-inch culvert 24-feet long. Total channel bottom impacted by the project will be approximately 0.002 acres and will require approximately 7 cubic yards of fill or less placed below the plane of ordinary high water to bed the pipe.	Trib. to Roaring Run	7/20/2005
05-H0134 INWP	Mr. Bob Kite 93 McBrydge Drive Swoope, VA 24479	Proposed project to remove accumulated river cobble and debris from approximately 200 linear feet of channel in order to restore the channel capacity of the creek. The site is located upstream of an existing cobble crossing, and the material will be removed to an upland disposal site. Work will most likely be done in the dry since this is a wet weather stream.	East Dry Branch	7/21/2005
05-H0135 INWP	Bridgewater College 402 East College Street Bridgewater, VA 22812-1599	Proposed project to construct a culvert crossing of a small intermittent headwater stream channel in order to provide access to an existing soccer field. A 7'x4'x16" box culvert will be installed. Approximately 0.004 acre of channel bottom will be impacted by the project and less than 5 cubic yards of fill will be placed below the ordinary high water mark for the project. No wetlands will be impacted by the project.	Trib. to North River	7/21/2005
05-H0137 INWP	Boys' Home, Inc. Attn: Mr. Sam Cunningham 306 Boys' Home Road Covington, VA 24426	Proposed project to stabilize approximately 380 linear feet of eroding bank using riprap at the toe of slope, grade, shape the bank on a 3:1 and seed. All work to be done to NRCS Standards and Specifications.	Dunlap Creek	7/26/2005
05-H0138 INWP	Mr. Richard Miller 8333 Centerville Road Bridgewater, VA 22812	Restore and stabilize approximately 175 linear feet of eroded bank and channel in order to prevent further stream channel impacts due to flooding events. A portion of the channel will be moved to its previous location approximately 15-20 feet. Banks will be sloped and revegetated.	N. Fk. Naked Creek	7/26/2005
05-H0139 INWP	Joseph & Phyllis Zimmerman 6490 Sangerville Road Bridgewater, VA 22812	Proposed project to enlarge an existing pond by excavating out the additional area from a pasture. No additional height will be added to the dam. Approximately 0.05 acre of fringe emergent wetlands will be impacted and mitigated by benching the edge of the pond to establish wetlands.	Trib. to Earhart Creek	7/27/2005
05-H0141 INWP	Bill Hausrath & Warren Koiner Lofton Ridge LLC P. O. Box 1180 Waynesboro, Virginia 22980	Proposed maintenance of an existing culvert crossing by placing riprap on the downstream side of the culvert for approximately 15 feet to reduce scour which is undermining the culvert pipes.	Pine Run	7/29/2005
05-H0142 INWP	Mr. John Allen Middlebrook, VA 24459	Proposed construction of a culvert crossing to a new home site. The crossing will be constructed on an intermittent headwater stream using a 72" x 32' culvert. Total impacts will be approximately 0.004 acres. Average channel width is approximately 4 feet, and no wetlands will be impacted by the project.	Dry Run	7/29/2005
05-H0144 INWP	Mr. Ben Blakemore HC2, Box 293 Warm Springs, VA 24484	Construct a culvert crossing to access property for a cabin site. The culvert crossing will be constructed using a (2) 7.5' x 32' culvert, and will impact approximately 0.01 acres of channel bottom.	Little Valley Run	8/5/2005
05-H0145 INWP	U. S. Forest Service George Washing/ & Jefferson N. F. Attn: Dawn Kirk 5162 Valleypointe Parkway Roanoke, Virginia 24019-5145	Proposed project to maintain an existing concrete slab foot bridge impacted by recent flooding events. Project is to remove accumulated cobble and debris from on and around the crossing.	N. Fk. Back Creek	8/11/2005
05-H0146 INWP	Virginia Military Institute Attn: Mr. Edgar Perrow, Jr., P. E. Director of Construction Office 307A Letcher Avenue Lexington, Virginia	Proposed project to relocate approximately 1200 linear feet of an existing undersized culvert in poor condition to reduce flooding of existing buildings and a playing field. The existing piped perennial stream will be move into a 1218' double-barrel 6' x 6' concrete box culvert able to handle the 10-year and 100-year storm events without exceeding the hydraulic grade line. Flowable nontoxic fill material will be used to abandon the required portions of the existing culvert channel after the stream is directed into the new channel. Proper erosion and sediment controls will be installed to minimize downstream sediment impacts.	Trib. to Woods Creek	9/15/2005
05-H0149 INWP	Barney and Lori Settles 7232 Hadow Drive Springfield, VA 22152	Proposed project to construct a culvert crossing of a headwater stream to access a building site for a home. The culvert crossing will be composed of (4) 30" and will be 15' x 10' impacting approximately 0.002 acre of channel bottom.	Trib. to Smith Creek	8/22/2005

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
05-H0150 INWP	Claybrook Associates, LLC Attn: Mr. Don Franco P. O. Box 5207 Charlottesville, VA 22901	Additional proposed impacts associated with the proposed construction of the Claybrook Subdivision access road which will impact the corner of an existing pond. The additional impacts will be approximately 480 square feet. Average depths are 12". This will require the discharge of approximately 17.8 cubic yards of fill placed below the ordinary high water mark.	Trib. to South River	8/22/2005
05-H0152 INWP	Wayne S. Rodeffer Harrisonburg, VA	Construct an access road to a building site. The crossing will be constructed using (2) 30" x 20' culverts. Total channel impacts will be approximately 0.009 acre.	Trib. to North River	8/22/2005
05-H0155 INWP	George Cason Property Azalea Park Charlottesville, VA	Proposed project to replace four 15-in" x 12' reinforced concrete culvert pipes with two 24" x 20' reinforced concrete culvert pipes. The purpose is to increase the ability of the pipes to carry expected high flows. Approximately 0.003 acre of channel bottom and less than 10 cubic yards of fill will be placed below the ordinary high water mark of the headwater tributary to bed the new pipes.	Trib. to Moores Creek	8/25/2005
05-H0158 INWP	Virginia Department of Transportation Attn: Ms. Renee Clark P. O. Box 2249 Staunton, VA 24401	Proposed construction of an additional lane to State Route 644 into the Massanutten Village complex. The project will upgrade and improve existing road culverts, including extensions in Quail Run and two tributaries. All crossings will impact less than 1/10 acre and require less than 10 cubic yards of fill be placed below the Ordinary High Water Mark to do the work.	Quail Run and Monger Run	8/29/2005
05-H0159 INWP	Stonewall Rifle & Pistol Club Attn: Mr. Tom Patterson P. O. Box 441 Staunton, VA 24401	Proposed project to restore the capacity of approximately 500 linear feet of the channel of an intermittent headwater drainage of approximately 660 acres. The work will follow the natural course of the channel and remove accumulated rock and debris in order to restore channel capacity.	Spruce Lick Run	8/29/2005
05-H0162 INWP	Mr. Leroy Rhodes 24 Millers Road Bridgewater, VA 22812	Stream stabilization project to reduce channel erosion from approximately 300 linear feet of channel. The project will involve the construction of a new curved channel to take out a 90-degree bend eroding the bank toward State Route 727. The new channel will be constructed to match the upstream and downstream natural channel, sloped and seeded.	Thorny Branch	11/3/2005
05-H0165 INWP	Ms. Leslie Brady 10303 Rawley Pike Hinton, VA 22831	Proposed construction of a recreational pond constructed by excavating out an area in an existing wetland of approximately 50' x 50' x 8 feet deep. Total impacts will be approximately 0.057 acres.	Trib. to Dry River	8/31/2005
05-H0169 INWP	SugarRay, LLC c/o George Ray 690 Berkmar Circle Charlottesville, VA 22901	Proposed project to modify approximately 90 linear feet of an intermittent headwater stream channel by placing the stream in a 48" pipe. This will provide room on the lot for a commercial building. Approximately 6.7 cubic yards of fill will be placed below the ordinary high water mark to bed the pipe.	Trib. to Meadow Creek	8/31/2005
05-H0170 INWP	Mr. Gary Argenbright 3012 Hankey Mountain Highway Churchville, VA 24421	Proposed project to remove accumulated cobble and debris from the channel of a small intermittent headwater stream for a distance of approximately 275 linear feet. The capacity of the channel to hold flooding events has been reduced by the action of the small culvert under State Route 250. A channel will be constructed to match the existing upstream channel down to the culvert and the excess excavated material will be spread in an upland disposal site.	Sixteen Mile Branch	9/15/2005
05-H0171 INWP	Ms. Patricia G. Aldred-Glick 2332 Bluegrass Trail Lexington, VA 24450	Remove accumulated cobble in order to reconstruct channel capacity to carry high water events. Site A will involve approximately 100 linear feet of channel, and Site B will involve approximately 75 linear feet of channel. In addition, riprap may be placed along approximately 50 feet of channel bank at Site A to reduce bank erosion at this point. All work will be done with a backhoe/trackhoe from the bank and the excavated material spread at an upland site.	North Buffalo Creek	9/19/2005
05-H0171 INWP	Ms. Patricia G. Aldred-Glick 2332 Bluegrass Trail Lexington, VA 24450	Remove accumulated cobble in order to reconstruct channel capacity to carry high water events. Site A will involve approximately 100 linear feet of channel, and Site B will involve approximately 75 linear feet of channel. In addition, riprap may be placed along approximately 50 feet of channel bank at Site A to reduce bank erosion at this point. All work will be done with a backhoe/trackhoe from the bank and the excavated material spread at an upland site.	North Buffalo Creek	9/19/2005

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
05-H0179 INWP	Mr. Chad Kimble HC2, Box 53E Blue Grass, VA 24413	Proposed construction of a small recreational pond by digging out a 50' x 60' section of a small spring run and wetlands. No dam will be placed on the channel. Proposed impacts will be approximately 0.069 acres.	Trib. to N. Fk. Potomac River	9/22/2005
05-H0181 INWP	Mr. Richard Gilliam Tally-Ho Farm 4295 Louisa Road Keswick, VA 22947	Proposed recreational pond that will impact approximately 0.09 acre of wetland and perennial headwater drainage, and between 480-500 linear feet of channel.	Trib. to Bottom Branch	9/26/2005
05-H0183 INWP	Mr. Elesson C. Hunt 64 Homer Lane Raphine, VA 24472	Rebuild a previously existing bridge crossing damaged in recent hurricane flooding. The work will involve adding concrete abutments where the bridge rested on log cribbing and raising and extending the bridge 10 feet to allow better passage of flooding events. The width of 14 feet will remain the same. Some abutment protection may be installed around the abutments below the ordinary high water line.	Jackson River	9/27/2005
05-H0184 INWP	Mr. John F. Ludt, IV 82 Sleepy Hollow Trail Staunton, VA 24401	Proposed project to reduce erosion of a perennial headwater stream just downstream of a culvert crossing by constructing a new channel across a meander point and backfilling approximately 30 linear feet of old channel. Banks will be graded and revegetated. No wetlands will be impacted by the project and approximately 0.006 acres of channel bottom will be impacted, and approximately 9.25 cubic yards of fill will be discharged below the ordinary high water mark.	Trib. to Follys Mill Creek	9/29/2005
05-H0185 INWP	Mr. Dale Hungerford 1202 Walkers Creek Road Middlebrook, Virginia 24459	Proposed maintenance of an existing riprap revetment constructed in 1995 damaged by past flooding events. In addition, the applicant proposes to add approximately 300 linear feet of riprap to further stabilize bank erosion problems.	Walker Creek	9/29/2005
05-H0186 INWP	Harry & Amy Scheuer 60 Lincord Lane Sycamore Valley Drive Lexington, VA 24450	Proposed project to upgrade an existing concrete and stone weir damaged by flooding from September 2004. The proposed concrete 4.5 foot high weir will be moved downstream approximately 40-50 feet and impact approximately 10-12' of channel. It will pond an area of approximately 0.06 acres of and back water for up to 200 feet behind the weir. The weir and ponded area will be used for recreation and will improve water flow for an existing gravity-fed pipe to an existing farm pond downstream of the site in an upland pasture.	Gilmer Creek	10/3/2005
05-H0188 INWP	Mr. Rod Herring Jerusalem Chapel Road Churchville, VA 24421	Proposed project to replace a low concrete bridge damaged and made unsafe by recent flooding events. The new bridge will be a span structure placed on concrete abutments and protected by large stone available on site. In addition, accumulated cobble and debris will be removed from approximately 200 linear feet of channel above the existing crossing which has choked the capacity of the channel to carry normal high water events. Large rock will be placed along the toe of the bank next to the bridge to help reduce erosion of the abutments.	N. Fk. McKittricks Branch	10/6/2005
05-H0188 INWP	Mr. Rod Herring Jerusalem Chapel Road Churchville, VA 24421	Proposed project to replace a low concrete bridge damaged and made unsafe by recent flooding events. The new bridge will be a span structure placed on concrete abutments and protected by large stone available on site. In addition, accumulated cobble and debris will be removed from approximately 200 linear feet of channel above the existing crossing which has choked the capacity of the channel to carry normal high water events. Large rock will be placed along the toe of the bank next to the bridge to help reduce erosion of the abutments.	N. Fk. McKittricks Branch	10/6/2005
05-H0189 INWP	Whispering Ridge Subdivision Stanardsville, Virginia	Proposed road crossing of two small intermittent headwater streams to provide access to a proposed subdivision. Culvert crossing 1 will impact approximately 0.002 acres and 70 linear feet of channel bottom and require approximately 2.9 cubic yards of fill placed below the ordinary high water mark to bed the pipe. Crossing 2 will impact approximately 0.006 acres and 70 linear feet of channel bottom and require approximately 7.8 cubic yards of fill to bed the pipe below the ordinary high water mark. Total impacts are 0.008 acres and 140 linear feet of channel bottom.	Trib. to Conway River	10/6/2005
05-H0191 INWP	Mr. Joshua Popkin 505 Campbell Road Keswick, Virginia 22947	Rehabilitate and existing dam for safety purposes due to incorporating an access road across the top. The old dam will be removed and replaced with a new dam just upstream of the old dam and the area restored. There will be no additional increase in the elevation of the existing floodpool; therefore, no additional impacts to stream channel or wetlands.	Trib. to Mechunk Creek	10/11/2005

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
05-H0193 INWP	Mr. Dwight Knically Hillside Farms 4338 Bowman Road Dayton, Virginia 22821	Proposed project to stabilize approximately 450-500 linear feet of eroding bank by grading the bank back from the low water line on a 3:1 or greater slope, and seeding with a grass mix in order to be able to mow the restored bank.	Cooks Creek	10/19/2005
05-H0196 INWP	Mr. Brasil W. Hamrick, Jr. 156 Laurel Hill Road Verona, VA 24482	After-the-fact authorization for the on going construction of a steel beam bridge crossing placed on concrete abutments constructed below the ordinary high water line. The project was to replace a bridge destroyed by the 1996 flooding. The access is for a building site for a single family home.	Back Creek	11/3/2005
05-H0198 INWP	Mr. John Waller Waller Construction Company, Inc. 2313 Kerr Drive Virginia Beach, VA 23454	Proposed construction of a concrete box culvert crossing of a small headwater stream channel for the purpose of providing access to a house location. The culvert will be 48" x 12' and will impact approximately 0.001 acre of channel.	Cold Run	10/24/2005
05-H0199 INWP	Mr. Bob Eanes 141 Huntington Place Waynesboro, Virginia 22980	Proposed construction of a small recreational pond adjoining a cabin site. The proposed project will backflood approximately 250-300 linear feet of a small perennial headwater stream and adjacent wetlands. Total impacts to jurisdictional waters will be approximately 0.078 acres.	Trib. to Irish Creek	10/24/2005
05-H0202 INWP	David Ferris 1020 Thornhill Road Lexington, VA 24450	Project to stabilize approximately 65 linear feet of eroding bank on an intermittent headwater stream using a rock bulkhead backfilled and revegetated. The project is to stop erosion toward an existing home.	Trib. to Woods Creek	10/25/2005
05-H0207 INWP	Mr. Reggie Kerns 2417 Kerns Road Dayton, VA 22821	Stabilize between 200-300 linear feet of eroding bank that is threatening an access road. Banks will be sloped and rocked to prevent further erosion.	Little Dry River	11/7/2005
05-H0208 INWP	Mr. Raymond Burkholder 3321 Lumber Mill Road Dayton, VA 22821	Proposed project to stabilize approximately 1000 linear feet of intermittent headwater stream channel by sloping back the bank from the ordinary high water line and revegetating. Approximately 100 linear feet of bank will need to be realigned by filling and sloping the bank to match the contours of the natural channel alignment. All slopes will be revegetated and maintained and there will be no channel modification. The stream channel will then be fenced. Work will be done with a backhoe or trackhoe from the bank.	Honey Run	11/7/2005
05-H0210 INWP	City of Staunton Mr. Edward L. Davis III Department of Public Works P. O. Box 58 Staunton, Virginia 24402-0058	Proposed project to repair a leaking sewer line crossing Gum Spring Branch. The repair will consist of installing a new 8" ductile iron pipe across the creek to connect to a manhole outside of the culvert. A temporary riprap pad will be installed in the channel to work off of while installing the line and the creek will be bypass pumped during installation. The channel will be restored once the maintenance has been completed.	Gum Spring Branch	11/8/2005
05-H0211 INWP	Valley View Mobil Home Park Wastewater Treatment Lagoon Closure Harrisonburg, VA	Proposed temporary road crossing required to haul sludge and top soil during the closure of a wastewater lagoon. The crossing will involve the placement of a 15-18" culvert x 18' long impacting approximately 0.001 acre of jurisdictional area.	Dry Fork Creek	12/6/2005
05-H0212 INWP	Kostich Construction, Inc. Greenecroft Subdivision Attn: Mr. Ted Kostich PO Box 358 Quinque, VA 22965	Proposed construction of a new subdivision requiring the construction of a single stream crossing and four utility crossings. The stream crossing will involve the placement of a 70' x 42" CMP impacting approximately 92 linear feet of intermittent headwater stream channel, and approximately 460 square feet of channel bottom. Approximately 10 cubic yards of fill will be discharged below the Ordinary High Water Mark to bed the pipe. In addition, there will be temporary impacts from the construction of four utility crossing impacting approximately 200 square feet of channel bottom. All crossings will be returned to pre-existing contours.	Trib. to Preddy Creek	11/15/2005
05-H0212 INWP	Kostich Construction, Inc. Greenecroft Subdivision Attn: Mr. Ted Kostich PO Box 358 Quinque, VA 22965	Proposed construction of a new subdivision requiring the construction of a single stream crossing and four utility crossings. The stream crossing will involve the placement of a 70' x 42" CMP impacting approximately 92 linear feet of intermittent headwater stream channel, and approximately 460 square feet of channel bottom. Approximately 10 cubic yards of fill will be discharged below the Ordinary High Water Mark to bed the pipe. In addition, there will be temporary impacts from the construction of four utility crossing impacting approximately 200 square feet of channel bottom. All crossings will be returned to pre-existing contours.	Trib. to Preddy Creek	11/15/2005

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
05-H0214 INWP	Mr. Jerry A. Rexrode P. O. Box 557 Monterey, Virginia 24465	Proposed project to construct a water and electric line to a new house which will involve temporary impacts associated with the crossing of a small headwater stream channel. The utility lines will be buried below the streambed and the channel returned to preexisting contours.	Trib. to West Strait Creek	11/16/2005
05-H0216 INWP	Chrissi & Joe Lester P. O. Box 912 Stanardsville, VA 22973	Request to maintain an existing concrete culvert crossing of Swift Run by removing accumulated debris and cobble deposits in order to restore culvert capacity.	Swift Run	11/17/2005
05-H0217 INWP	CSX Transportation 500 Water Street Jacksonville, Florida 32202	Proposed project to clean up an old recycling site owned by CSX Transportation. The project will require the removal of debris and waste from approximately 150 linear feet of perennial headwater stream channel bank. The contractor will be using a backhoe to pull back the debris from the banks with no work in the channel of the creek. There is a possibility that portions of the stream channel covered by concrete and metal pipes will be daylighted and the channel restored in its existing location. There will be no channel shortening or relocation as part of this project.	Trib. to Lewis Creek	11/18/2005
05-H0219 INWP	Norfolk Southern Corporation Safety & Environmental Protection 8 North Jefferson Street Roanoke, VA 24042-0013	Emergency repair to the concrete abutments at the railroad bridge crossing of the South River. Project will involve some channel work in order to fix the problems.	South River	12/1/2005
05-H0220 INWP	Mr. James O. Ballard 262 Hebron Court Madison, VA 22727	Proposed project to construct a culvert crossing of a small intermittent headwater stream for access. The crossing will be constructed using a 36" x 16-18' pipe resulting in impacts of approximately 0.001 acre of channel bottom. Less than 2 cubic yards of fill will be required to bed the pipe below the ordinary high water mark.	Trib. to the Rivanna River	12/2/2005
05-H0224 INWP	Ms Robin Eastham c/o King Ehrlich Investment Company, Inc. Batesville, VA	Proposed construction of a culvert stream crossing which will impact approximately 0.004 acre of headwater stream channel for the placement of a 42" culvert. The purpose of the project is to provide access for the construction of a new home.	Trib. to Hardware River	12/6/2005
05-H0229 INWP	Mr. Donald Lainhart 14656 Boxwood Drive Palmbeach Gardens, FL 33418	Proposed construction of an access road acrossing 3 places on an intermittent headwater stream for the purpose providing access to the property. A 30-36 inch culvert approximately 20 feet long will be used impacting a maximum of 0.004 acre of jurisdictional area. Less than 15 cubic yards of fill will be used to bed the pipe below the ordinary high water mark.	Trib. to Burruss Branch	12/8/2005
05-H0230 INWP	Spruce Hill Excavating Company Attn: Mr. Michael B. McCray Rt. 615, Box 35 McDowell, Virginia 24458	Maintain an existing ford to include removing accumulated cobble from up to a total of 200 linear feet of channel around the crossing, and to refurbish the crossing and approach with new stone.	Trib to Jackson River	12/9/2005
05-H0231 INWP	Mr. Philip Clayton 259 Hawkridge Lane Lexington, VA 24450	Stabilize a total of approximately 100 linear feet of bank using riprap stone. Project is to protect a road and bank from further erosion.	Poague Creek	12/13/2005
05-H0232 INWP	Mr. Stanley Shifflett 836 Mt. Elliot Avenue Staunton, VA 24401	Proposed extension of an 8-inch sewer line requiring the crossing of an intermittent headwater stream. The pipe will be buried approximately 4-6 feet below the stream channel and cross the channel 6 times. All crossing will be reconstructed to previously existing contours. No wetland will be impacted by the project.	Trib. to South River	12/15/2005
05-H0234 INWP	Fried Companies, Inc. Ponds Edge Subdivision 5924 Fried Farm Road Crozet, Virginia 22932	Proposed subdivision development which will impact 0.01 acre of emergent (PEM) wetlands as a result of changing an existing farm pond into a stormwater management facility.	Trib. to Stanardsville Run	12/15/2005
05-H0237 INWP	Mr. Francis Chester P. O. Box 60 Augusta Springs, VA 24411	Remove accumulated cobble from upstream of an existing ford in order to open up the channel where a small island has formed. The work will be within the channel where a steel beam supported bridge will be constructed from bank to bank. The ford will be kept in place for heavy equipment crossing. Work will involve approximately 100 linear feet of channel.	Jennings Branch	12/16/2005

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
05-H0238 INWP	Mr. Kirk Bumstead 384 Cedar Creek Road Natural Bridge, VA 24578	Maintain an existing 14' x 16' ford by adding additional rock and gravel to provide better access to a building site.	Cedar Creek	12/21/2005
05-H0239 INWP	Ms. Debbie Morris 12427 Blue Heron Lane Fulks Run, VA 22830	Stabilize approximately 250 linear feet of eroding bank damaged by recent flooding events. Remove accumulated stream cobble from above the ordinary high water mark for backfill and armor the toe of the bank with large stones where available.	Long Run	12/23/2005
05-H0242 INWP	Mr. Donald Smith 7344 Community Center Road Dayton, VA 22821	Proposed project to stabilize up to 500 linear feet of an eroding bank that is within about 30 feet of the foundation of a house.	Briery Branch	12/28/2005
05-I0104 INWP	US Army Garrison C/o Tim Sutherland Fort AP Hill, VA	Upgrade and repair an existing earthen dam/paved road that connect Upper and Lower Lake Travis.	Travis Lake	8/10/2005
05-I0141 INWP	Dr. Matt Williamson PO Box 266 Spotsylvania, VA 22553	Proposal to construct a pond which will impact 154 LF of intermittent stream channel as per drawings titled "Dr. Matt Williamson, Pond" and dated 9/30/05.	Trib to North Anna River	11/4/2005
05-I0144 INWP	Somerset Development Co. Attn. Rand Sompayrac PO Box 70 Bel Alton, MD 20611	Residential development of 16.14-acre "Willow Hill Subdivision" associated with permanent impacts to 0.02-acre of POW for construction of stormwater facility as per drawings titled "Stormwater Management Plan Willow Hill Subdivision" June 2005 and revised October 10, 2005.	Trib to Keys Run	11/21/2005
05-J0084 INWP	Terry Parsell	Installation of a culverted road crossing (two 50' long, 36" corrugated metal pipes) and associated riprap for inlet and outlet protection - to provide access to 2 lots of residential subdivision known as Zeigler Downs. Pipes will be installed and countersunk in the streambed as per Corps regional conditions (enclosed).	Back Creek	7/28/2005
05-J0107 INWP	Virginia Land Development 2416 Willowlawn Street Roanoke, Virginia 24018 Attn: Randall Holley	Installation of a 90' long culverted road crossing (one 48" corrugated metal pipe) and associated riprap for inlet and outlet protection - to provide access to a residential subdivision known as Creighton Ridge Subdivision. Pipes will be installed and countersunk in the streambed as per Corps regional conditions.	Buck Run	9/22/2005
05-J0109 INWP	Carroll County Public Service Authority 605-2 Pine Street Hillsville, Virginia 24343 Attn: Ray E. Hill	Installation of a concrete encased 8" sewer pipeline for a distance of approximately 30 feet. The submerged crossing will be buried a minimum of 24" below the streambed and will utilize non-erodible cofferdams to insure all work is performed in the dry.	Pine Branch	9/28/2005
05-J0109 INWP	Carroll County Public Service Authority 605-2 Pine Street Hillsville, Virginia 24343 Attn: Ray E. Hill	Installation of a concrete encased 8" sewer pipeline for a distance of approximately 30 feet. The submerged crossing will be buried a minimum of 24" below the streambed and will utilize non-erodible cofferdams to insure all work is performed in the dry.	Pine Branch	9/28/2005
05-J0110 INWP	American Electric Power 3564 Byllesby Road Ivanhoe, Virginia 24350 Attn: Mark Smith	Replacement of the existing wooden flashboards - first excavating an area behind the 6 sections, (approximately 10' wide and 35' long to a depth of 5'); temporarily stockpiling the material adjacent to the trench in the dewatered reservoir; installing new flashboards; and then placing the material back the trench and subsequently restoring the area to its pre-construction conditions.	New River	9/28/2005
05-J0111 INWP	American Electric Power Buck Dam Road Ivanhoe, Virginia 24350 Attn: Mark Smith	Installation of a grounding grid in the forebay of the existing reservoir	New River	9/28/2005
05-J0120 INWP	Laura Bullard Bullard Family Patnership 7140 Bluesky Lane Dublin, Virginia 24084-6053	Installation of approximately 900 linear feet of riprap along the ordinary high water shoreline and extending a maximum distance of 10' channelward of full pond elevation (1847').	Claytor Lake	10/25/2005

<u>PERMIT NO.</u>	<u>PERMITTEE</u>	<u>WORK AUTHORIZED</u>	<u>WATERWAY</u>	<u>DATE ISSUED</u>
05-J0124 INWP	Roanoke College Trustees 221 College Lane Salem, VA 24153 Attn: George (Skip) Zubrod, Vice President	Installation of 158 linear feet of two (2) thirty-six inch culverts and associated riprap for inlet and outlet protection (approximately 12' each side) -- for the purpose of constructing a new parking lot for Roanoke College.	Williams Branch	10/12/2005
05-J0127 INWP	Mitchell's Point Marina 1129 Marina Lane Huddleston, Virginia 24104 Attn: Tom Buck	Installation of approximately 1330 linear feet of riprap along the ordinary high water shoreline and extending a maximum distance of 5' channelward of full pond elevation (795') in association with the repair and rehabilitation of existing but failing structures	Smith Mt. Lake	11/21/2005
05-J0131 IRGP	Willard Construction Company c/o The Waters Edge 1825 Waterss Edge Drive Penhook, Virginia 24137 Attn: Jeff Snyder	a). Remove approximately 65 feet of an existing open-pile pier; b). Excavate approximately 65 cubic yards of sediment to a maximum depth of 9 feet below ordinary high water; c). Installation of a 4 foot high, 8' by 10' concrete structure to house the modified water intake lines, with new screen sizing to be 2mm screens and the intake velocity to be 0.25 fps.	Smith Mt. Lake	11/22/2005
05-J0131 INWP	Willard Construction Company c/o The Waters Edge 1825 Waterss Edge Drive Penhook, Virginia 24137 Attn: Jeff Snyder	a). Remove approximately 65 feet of an existing open-pile pier; b). Excavate approximately 65 cubic yards of sediment to a maximum depth of 9 feet below ordinary high water; c). Installation of a 4 foot high, 8' by 10' concrete structure to house the modified water intake lines, with new screen sizing to be 2mm screens and the intake velocity to be 0.25 fps.	Smith Mt. Lake	11/22/2005
05-J0132 INWP	Norman Lee Wilfong, Jr. 430 West Cleveland Avenue Vinton, Virginia 24179	Construction of a recreational pond - impacting less than 300 feet of headwater stream	Little Creek	10/31/2005
05-J0140 INWP	Willard Construction Company c/o The Waterfront 200 Larboard Drive Moneta, Virginia 24121 Attn: H. T. Page	Excavate, by bucket method, approximately 90 cubic yards of material from an area 3 feet wide and 85 feet long starting at the full pond elevation of 795 and extending to a maximum depth of 10.6 feet. The area will be backfilled to pre-construction contours with VDOT Class 1 riprap; after a 20" intake pipe and wet well are installed. New mesh screening will be 2mm in size and the intake velocity will be 0.25 fps.	Smith Mt. Lake	11/22/2005
05-K0003 INWP	Maggard Branch Coal Company, LLC P.O. Box 2560 Wise, VA 24293	Relocation of approximately 575 linear feet of perennial stream channel to accommodate deep mine face up.	Mud Lick Creek	7/8/2005
05-K0005 INWP	Lambert Coal Company, Inc. Dennis B. Sutherland P. O. Box 490 Nora, VA 24272	Discharge of ~ 2032 cyds of fill to construct 2 hollow fills & a sediment pond. ~ 4061 lft of stream will be impacted by fill & ~247 lft of stream will be backflooded. Applicant proposes to mitigate for this work by reclamation of ~122 acres of abandoned mine lands, elimination of 12,200 lft of highwall, reconstruction of ~4083 lft of stream channel & ~0.42 acres of wetlands.	Roaring Fork	7/8/2005

05-V0743 IRGP	Silvio Mancone 621 Woodstock Road Virginia Beach, VA 23464	To place 85' of riprap for erosion control and to construct a 5' x 20' pier with a 12' x 12' L-head, two 8' x 8' floating docks, and a 12' x 13' boat lift for recreational access, as depicted in project drawings dated December 15, 2004. Pier to be constructed a minimum of 4' above vegetated substrate and riprap will encroach channelward no more than 1 foot.	Woodstock Cove	9/7/2005
05-V0743 IRGP	Silvio Mancone 621 Woodstock Road Virginia Beach, VA 23464	To place 85' of riprap for erosion control and to construct a 5' x 20' pier with a 12' x 12' L-head, two 8' x 8' floating docks, and a 12' x 13' boat lift for recreational access, as depicted in project drawings dated December 15, 2004. Pier to be constructed a minimum of 4' above vegetated substrate and riprap will encroach channelward no more than 1 foot.	Woodstock Cove	9/7/2005
05-V0754 ISLP	Dean Shoosmith & Dave Mabe 12620 Lewia Rd. 12710 River Rd Chester, VA 23831 Chesterfield, VA 23838	Mechanically dredge 114 cubic yards of material to a depth not to exceed 2' mean low water. The dredged material will be dewatered on-site, so as to not allow re-entry into the waterway, then trucked to an upland disposal area. All construction is to be conducted in accordance with the attached drawings dated March 24, 2005'.	Kibble Pond	9/22/2005
05-V0778 IRGP	Gilbert Owens 4044 Rosewell Plantation Road Gloucester, VA 23061	Placement of 97 ft. of riprap , construct a 100 ft. by 6 ft. pier with a 10 ft. by 25 ft. "T" head and a 12 ft. by 12 ft. boatlift extending a total of 122 feet from the MHW line as shown on drawing "Pier Detail" dated 4/4/05.	York River	7/28/2005
05-V0778 INWP	Gilbert Owens 4044 Rosewell Plantation Road Gloucester, VA 23061	Placement of 97 ft. of riprap , construct a 100 ft. by 6 ft. pier with a 10 ft. by 25 ft. "T" head and a 12 ft. by 12 ft. boatlift extending a total of 122 feet from the MHW line as shown on drawing "Pier Detail" dated 4/4/05.	York River	7/28/2005
05-V0787 ISDO	Russell B. Davis 1521 Quail Point Road Virginia Beach, Virginia 23454	Construct a marina-condo complex, "Sunset Gardens Marina" - ten piers with condos above and 290-352 private marina slips in South Branch of the Elizabeth River. Also, construction of shellfish hatchery.	S/B Elizabeth River	8/10/2005
05-V0822 IRGP	Vaughn Pruitt Jr, & Beverly Pruitt P.O. Box 73 Onancock, Virginia 23417	Repair 135 linear feet of rip-rap revetment which is six (6) feet wide and six (6) feet out (1:1 slope).	Occohannock Creek	12/20/2005
05-V0827 IVDC	Cotton Hill Land Company c/o Boone Homes, Inc. P.O. Box 8156 Roanoke, Virginia 24014	Construction activities will result in the alteration 540 linear feet of headwater streams and 0.06 acres of a palustrine, forested wetland for the installation of a culverted road crossing, construction of a stormwater retention facility and fill for residential lots. These losses will be offset by an on-site mitigation package that includes stream riparian buffer enhancement and preservation along 590 linear feet of stream channel; as well as payment of \$59,698.40 to the Virginia Aquatic Resources Trust Fund. The total on-site mitigation areas will include 5.1 acres, as outlined in the revised mitigation plan submitted on September 9, 2005 and identified as Figure 2. All the mitigation areas will be preserved in perpetuity by the granting of protective covenants.	Back Creek	11-10-2005
05-V0849 IRGP	Robert Berndt 805 Cavalier Drive Virginia Beach, VA 23451	To construct a 5-foot wide by 112-foot long by 4-foot high private pier with a 4-foot wide by 12-foot long ramp to a 6-foot wide by 20-foot long floating dock; to install 65 linear feet (LF) of riprap revetment landward of the mean high water (MHW) line; and to install 107 LF of marsh toe stabilization. All construction to follow plans dated March 9, 2005 (USACE date stamped April 14, 2005).	Little Neck Creek	7/25/2005
05-V0849 IRGP	Robert Berndt 805 Cavalier Drive Virginia Beach, VA 23451	To construct a 5-foot wide by 112-foot long by 4-foot high private pier with a 4-foot wide by 12-foot long ramp to a 6-foot wide by 20-foot long floating dock; to install 65 linear feet (LF) of riprap revetment landward of the mean high water (MHW) line; and to install 107 LF of marsh toe stabilization. All construction to follow plans dated March 9, 2005 (USACE date stamped April 14, 2005).	Little Neck Creek	7/25/2005
05-V0860 IRGP	Gerald Banks 3 Flaxmill Road Newport News, Virginia 23608	The applicant proposes to place 319' linear feet of class III rip rap on the bank to arrest erosion after storm damage from hurricane Isabel.	Warwick River	8/4/2005
05-V0867 INWP	Dept. of Game & Inland Fisheries Mr. James C. Adams, Capital Programs Director 4010 West Broad Street Richmond, VA 23230	Repair the road and place riprap along 3,660 linear feet of shoreline and temporarily impact 1,525 square feet of vegetated wetlands, as shown on the plans entitled "Virginia Department of Game & Inland Fisheries, Hog Island Storm Damage Road and Shoreline Repair" dated July 14, 2005 by Burgess & Niple. 05-V0936 INWP	Pedro and Myrna Rivera 1935 Pine Cone Lane Hayes, VA 23072	Proposed riprap placed over existing riprap as shown on drawing entitled Pedro N. Rivera cross sectional, no date	Sarahs Creek	7/11/2005
05-V0957 INWP	Route 28 Corridor Improvements LLC 22894 Pacific Boulevard Dulles, VA 20166	This is a request to extend an existing culvert and place fill to widen and improve an existing road.	Cain Branch	8/31/2005
05-V0960 IRGP	Helen Kidwell 1562 Chela Avenue Norfolk, VA 23503	The applicant proposes to move a boatlift from the end of the pier and place it on the north side of the pier, to install a new (larger) boatlift in the old location of the aforementioned boatlift, to install two boat davits, and to construct two 6' long, 4' wide finger piers to access boatlifts.	Hampton Roads	7-19-2005
05-V0964 INWP	Peter Kucera 1723 Banning Road Norfolk, VA 23518	Add 1-1 1/2 feet of riprap to top of existing riprap for approximately 265 feet as shown on drawing titled Plat of Property dated 1/23/74	Ware River	7/11/2005
05-V0967 ISIP	University of Virginia Foundation Research Park at North Fork Attn: Mr. Frederick A. Missel P. O. Box 400218 Charlottesville, Virginia 22904-4218	The applicant received an ASP-18 permit (97-V1961) on April 23, 1998 to provide building pad sites and infrastructure facilities supporting the development of a research park. The project would impact approximately 4.40 acres of wetlands and waters of the U. S., down from the 6.12 acres originally proposed. Over 200 acres of the total 525 acres was to remain in green space, and the applicant mitigated the cumulative loss of wetlands and waters of the U. S. by creating and preserving 0.62 acre of PEM wetland, purchase of 4.22 credits in the James River Mitigation Bank as compensation for the 2.11 PFO wetland impacts, and by restoring 380 linear feet of perennial stream channel. A total of 11,958 linear feet of stream channel is preserved within the 6.44 acres of WOUS preservation area. To date 2.69 acres of permitted impacts have been finalized. There is no ongoing work at this time, and this permit application request authorization to impact the remaining 1.71 acres of WOUS originally permitted under 97-V1961.	Trib. to Flat Branch	7/11/2005

05-V2011 IRGP	Roswell & Deborah White 2904 Buccaneer Road Virginia Beach, VA 23451	To install 104.5 linear feet (LF) of vinyl bulkhead less than 2-feet channelward of existing bulkhead with a 10-foot return; to install 90 LF of riprap revetment in front of remaining bulkhead; to construct a 4-foot-wide by 24-foot-long marginal wharf; and to install a 12,000 lb. vertical boatlift. All construction to follow plans dated July 20, 2005 (USACE date stamped August 29, 2005).	Long Creek	9/14/2005
05-V2011 IRGP	Roswell & Deborah White 2904 Buccaneer Road Virginia Beach, VA 23451	To install 104.5 linear feet (LF) of vinyl bulkhead less than 2-feet channelward of existing bulkhead with a 10-foot return; to install 90 LF of riprap revetment in front of remaining bulkhead; to construct a 4-foot-wide by 24-foot-long marginal wharf; and to install a 12,000 lb. vertical boatlift. All construction to follow plans dated July 20, 2005 (USACE date stamped August 29, 2005).	Long Creek	9/14/2005
05-V2012 INWP	Carolyn Lawrence 1121 West Revere Point Road Virginia Beach, VA 23455	To install 41 linear feet of timber bulkhead no more than 2-feet channelward of the existing deteriorating bulkhead. All construction to follow plans dated August 17, 2005 (USACE date stamped August 29, 2005).	Chesapeake Bay	9/19/2005
05-V2015 IRGP	Lawrence Jackson Widener 10312 Ridgemoor Dr Silver Spring, MD 20901	Construct a 6 by 80 foot open pile pier to include a 10 by 25 foot L-head leading left, a boat lift on the right and associated mooring piles	Tabbs Creek	11/2/2005
05-V2017 IRGP	Mr. Wayne Fields 4215 Foxxglen Run Chesapeake, VA 23321	To construct a 4' x 39' with an 8' x 16' T-head and a 6' x 8' floating dock, as depicted in project drawings dated June 27, 2005 and revised September 23, 2005. Two boats will be moored at the proposed structure, increasing the total channelward encroachment from 47' to 53.5'.	Drum Point Creek	10/28/2005
05-V2019 IVDA	Dyer Construction, Inc. Mr. Will Dyer 700 Down Street Richmond, Virginia 23222	to fill 0.04 acre of wetlands to construct residential lot	Pocosnock	9/15/2005
05-V2020 INWP	Mr. Temple C. Moore, P.E. Pittsylvania County Service Authority 405 R & L Smith Drive Danville, VA 24540	Upgrade of 6 sanitary sewer lines crossings to existing prison.	Tributaries to Cherrystone Creek	10/18/2005
05-V2026 IRGP	Arlington Plantation Home Owners Association c/o Marvin Milton, President P.O. Box 13 Capeville, Virginia 23313	Construct three (3) breakwaters with beach nourishment. The southern 50-foot long breakwater is attached to an existing 95-foot long groin which will connect to a proposed 125-foot long rip-rap revetment (having a 2:1 or 3:1 slope). There will be a 30-foot gap and then the middle breakwater will be 80 feet long. After another 30-foot gap the northern most will be 80 feet long. The breakwaters will be placed on filter cloth, have a bottom width of 13 feet and a top width of 3 feet, will be on a 1.5 to 1 slope. They will be placed, on average, 112 feet channelward of the mlw. Beach nourishment consists of 1887 cubic yards of coarse grain sand.	Chesapeake Bay	12/13/2005
05-V2027 IRGP	Peaceful Ponds Homeowners Association c/o Lance Williams P.O. Box 177 Jamesville, Virginia 23398	Construct 960 linear feet of bulkhead with backfill two feet channelward of the existing, dilapidated structure, having return walls at both ends. Construct a rip-rap revetment which will be used as marsh-toe stabilization extending 4 feet channelward of the bulkhead (mean high water). The bulkhead and rip-rap will impact 5,760 square feet of subtidal substrate. Remove the existing dilapidated groins. Construct three (3) 6-foot by 8-foot stairs into the waterway.	Chesapeake Bay	9/29/2005
05-V2031 IRGP	James Heenan 3044 Lynndale Road Virginia Beach, VA 23452	To remove the existing boatlift and install a 7-foot-wide by 32-foot-long floating dock and associated access ramp channelward of the pier end and to install a vertical boatlift to the right of the new floating dock. All construction to follow plans July 27, 2005 (USACE date stamped September 9, 2005).	E/B Lynnhaven River	9/22/2005
