

NAO-2007-04269-GDC

---

**Selected Water**

---

**Folder** NAO-2007-04269-GDC  
**Form** JD3  
**Name** Wetland 1  
**Local Waterway** Northwest River

**Determination**

---

**Type** Wetlands adjacent to but not directly abutting RPWs that flow directly or indirectly into TNWs  
**Area** 101171.4

**Characteristics of all wetlands adjacent to the tributary**

---

All wetland(s) being considered in

Directly Abuts?

Summarize overall biological, chemical and physical functions being performed  
Wetland provides significant wildlife habitat, has hydric soils that perform chemical functions, and provides flood water retention.
