Hydrodynamic and Water Quality Modeling

In 2016 and 2017, Hydrodynamic and Water Quality Modeling was completed by the Applied Marine Science and Ocean Engineering Department from the Virginia Institute of Marine Science to assess impacts of the No Action Alternative/Future Without Project and of the Action Alternative of project implementation. Due to length and file size, the final modeling reports can be found at the project’s website: http://www.nao.usace.army.mil/About/Projects/Norfolk-Harbor-Channel-Deepening/
