Project Manager: Julie Hamilton	Project Name: Martin Marietta Midlotian Quarry Expansion
Date: April 25, 2025	Project Number: NAO-2007-02396 (25-V0883)

Project Description: Expansion of an existing quarry
--

Species Under the Jurisdiction of FWS:				
Species/Resource Name	Habitat/Species Presence in Action Area	Sources of Info	ESA Section 7 Determination	Project Elements that Support Determination
<b>BATS</b>				
Tricolored Bat (Perimyotis subflavus)	Dkey & CM (NLAA)	The tricolored bat is a small insectivorous bat that is distinguished by its unique tricolored fur and often appears yellowish to nearly orange. The once common species is wide ranging across the eastern and central United States and portions of southern Canada, Mexico and Central America. During the winter, tricolored bats are often found in caves and abandoned mines, although in the southern United States, where caves are sparse, tricolored bats are often found roosting in road-associated culverts where they exhibit shorter torpor bouts and forage during warm nights. During the spring, summer, and fall, tricolored bats are found in forested habitats where they roost in trees, primarily among leaves of live or recently dead deciduous hardwood trees, but may also be found in Spanish moss, pine trees, and occasionally human structures.	May affect - Not likely to Adversely Affect	Proposed species , Dkey- may affect, The Applicant will follow the pup season TOYR from May 15th to July 31st prohibiting the cutting of trees if the tricolored bat is listed.
<b>OTHER FAUNA</b>				
Monarch butterfly (Danaus plexippus)	N/A		N/A	Proposed species
<b>FLORA</b>				
				none
<b>CRITICAL HABITAT</b>				
N/A
