

DRY LAND APPROVED JURISDICTIONAL DETERMINATION FORM¹
U.S. Army Corps of Engineers

This form should be completed by following the instructions provided in Section IV of the JD Form Instructional Guidebook.

SECTION I: BACKGROUND INFORMATION

A. REPORT COMPLETION DATE FOR APPROVED JURISDICTIONAL DETERMINATION (JD): January 23, 2018

B. DISTRICT OFFICE, FILE NAME, AND NUMBER: NAO-2017-02083 / VMRC# 17-2025

C. PROJECT LOCATION AND BACKGROUND INFORMATION: 3036 Sandfiddler Road

State: Virginia County/parish/borough: City: Virginia Beach
Center coordinates of site (lat/long in degree decimal format): Lat. 36.7227 °, Long. -75.9348 °
Universal Transverse Mercator:

Name of nearest waterbody: Atlantic Ocean
Name of watershed or Hydrologic Unit Code (HUC): 03010205

- Check if map/diagram of review area is available upon request.
 Check if other sites (e.g., offsite mitigation sites, disposal sites, etc...) are associated with this action and are recorded on a different JD form.

D. REVIEW PERFORMED FOR SITE EVALUATION (CHECK ALL THAT APPLY):

- Office (Desk) Determination. Date: January 19, 2017
 Field Determination. Date(s): [Click here to enter a date.](#)

SECTION II: SUMMARY OF FINDINGS

A. RHA SECTION 10 DETERMINATION OF JURISDICTION.

There **are no** "navigable waters of the U.S." within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the review area.

B. CWA SECTION 404 DETERMINATION OF JURISDICTION.

There **are no** "waters of the U.S." within Clean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area.

SECTION III: DATA SOURCES.

A. SUPPORTING DATA. Data reviewed for JD (check all that apply - checked items shall be included in case file and, where checked and requested, appropriately reference sources below):

- Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant: [Click here to enter text.](#)
 Data sheets prepared/submitted by or on behalf of the applicant/consultant.
 Office concurs with data sheets/delineation report.
 Office does not concur with data sheets/delineation report.
 Data sheets prepared by the Corps: [Click here to enter text.](#)
 U.S. Geological Survey Hydrologic Atlas: [Click here to enter text.](#)
 USGS NHD data.
 USGS 8 and 12 digit HUC maps.
 U.S. Geological Survey map(s). Cite scale & quad name: [Click here to enter text.](#)
 USDA Natural Resources Conservation Service Soil Survey. Citation: [Click here to enter text.](#)
 National wetlands inventory map(s). Cite name: [Click here to enter text.](#)
 State/Local wetland inventory map(s): [Click here to enter text.](#)
 FEMA/FIRM maps: [Click here to enter text.](#)
 100-year Floodplain Elevation is: [Click here to enter text.](#) (National Geodectic Vertical Datum of 1929)
 Photographs: Aerial (Name & Date): MHW_Aerial 1/19/2017
 or Other (Name & Date): VMRC Site Photos 1/19/2017
 Previous determination(s). File no. and date of response letter: [Click here to enter text.](#)
 Applicable/supporting case law: [Click here to enter text.](#)
 Applicable/supporting scientific literature: [Click here to enter text.](#)
 Other information (please specify): [Click here to enter text.](#)

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: [Click here to enter text.](#)

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

The new "Dry Land Approved JD Form" to be used when making the determination that the review area is comprised entirely of dry land.

There was some discussion during the webinar Q&A about the dry land approved JD form not being appropriate for use when there are "potential wetlands" in the JD review area. The key is that we cannot use the dry land approved JD form when there is a potential jurisdictional feature within the JD review area. A potential jurisdictional feature includes a feature that appears to be a wetland and requires data points to confirm the presence of a wetland (which would then require a determination as to its jurisdictional status). The dry land form can be used where a sample point does not identify any of the three wetland parameters. The full-length post-Rapanos approved JD form should continue to be used where a sample point positively identifies at least one of the three wetland parameters. Some sites may not require any data points at all when it is clear from off-site/on-site information that no potential wetlands are present.
